SEE THE BOAT? CAN THE BOAT RUN? NO THE BOAT CANNOT RUN. WHY CANNOT THE BOAT RUN? THE BOAT CANNOT RUN BECAUSE IT IS A SPEED BOAT.

SPORT NEWS OF A DAY; HOME AND ABROAD

BOWLING

City League. In the city league on Black's alleys last evening, the Braves took four points from the Elks. Bailey on the winning side played well, having an average of 108. The score:

Table with columns for Team, Total, and Average. Rows include Elks, McKean, Logan, Steel, MacMichael, and Howard.

Braves. In the five-man league on Victoria alleys last evening, Team No. 6 won four points from Team No. 2. The score:

Table with columns for Player, Total, and Average. Rows include Stevens, Thurston, McDonald, and Ferguson.

No. 2 Team. Kelly won the roll-off Tuesday. Scores: 120, 116, 110-346.

CURLING. In the Thistle curling ice last night the rink skipped by J. C. Chesley won the final match in the president's cup series. The rinks and their respective scores follow:

Table with columns for Team, Total, and Average. Rows include W. Barnes, P. L. Archibald, R. McKendrick, E. S. R. Murray, F. J. Likely, J. C. Chesley, and D. Willett.

HOCKEY. Tied for Championship. Ottawa and the Montreal Wanderers are tied for the championship of the National Hockey Association as a result of victories last evening over Quebec and the Toronto respectively. They will arrange a series of three games for the trophy.

Halifax Holds McLellan Cup Against Sydney. Halifax, March 3.—In the match for the McLellan cup the North Sydney curlers met defeat at the hands of the Halifax Curling Club tonight. Three rinks played, the Halifax team scoring a total of 49 against Sydney's 45.

Halifax Holds McLellan Cup Against Sydney. Ottawa and the Montreal Wanderers are tied for the championship of the National Hockey Association as a result of victories last evening over Quebec and the Toronto respectively. They will arrange a series of three games for the trophy.

SKATING. Leadbetter Wins. Westville, March 2.—The county championship skating races were run off in Pictou tonight. Westville carried off the honors. The senior mile, Leadbetter won handsily in the time of 3:30.

TORTURED BY CONSTIPATION

"Fruit-a-tives" Cured Paralyzed Bowels and Digestion

St. Boniface de Shawinigan, Que., Feb. 2nd, 1914. "It is a pleasure to me to inform you that after suffering from Chronic Constipation for 2 1/2 years, I have been cured by 'Fruit-a-tives' while I was a student at Berthier College, I became so ill I was forced to leave the college. Severe pains across the intestines continually tortured me and it came to a point when I could not stoop down at all, and my digestion became paralyzed. Some one advised me to take 'Fruit-a-tives' and at once I felt a great improvement. After I had taken four or five boxes, I realized that I was completely cured and what made me glad, also, was that they were acting gently, causing no pain whatever on the bowels. Those who suffer with Chronic Constipation should follow my example and take 'Fruit-a-tives' for they are the medicine that cures."

MAGLOIRE PAQUIN. "Fruit-a-tives" are sold by all dealers at 50c a box, 6 for \$2.50, trial size, 25c or sent postpaid on receipt of price by Fruit-a-tives, Limited, Ottawa.

Tools, pitcher, formerly with the Pittsburgh Nationals, has signed a contract with the Columbus American Association team, according to a message from South Framingham, Mass., where Manager Quinn signed O'Toole.

McGraw at Training Camp. Marlin, Texas, March 4.—Manager McGraw arrived yesterday and took charge of the Giants' training camp. Fitcher Arthur Brown has reported to McGraw and started practice with the regulars.

SOCCER. Players Out of Work. London, March 4.—At the end of the football season on April 30, the English soccer players will find themselves in a position never experienced before, that of being out of work. All contracts with the professional players, with the exception of a small number who signed until April, 1915, will end.

The signing season, which begins on May each year, will be held over until late in August, so as to prevent any inducements being held out which would interfere with the call to the colors. The English clubs must neither offer nor pay summer wages nor anything in the nature of a retaining fee, in fact, not do anything tending to keep the players from service.

Owing to the greatly reduced attendance at the league games this season, all the clubs are suffering badly from financial straits and the Football Association has called a special meeting for March 29 to adopt a scheme to help the clubs and to consider important alterations in the playing rules.

One question that will be considered is that of salaries to be paid the players in future, as it is thought in official quarters that under the altered conditions a much smaller sum than the present one would be a reasonable salary for all soccer players.

TYLER SENT TO MINOR LEAGUE

Braves Off To Macon For Training Camp—Red Sox Off For Hot Springs

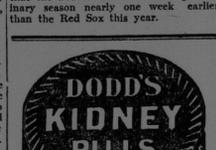

Boston, Mass., March 3.—The advance guard of the champion Boston Braves have left for the training camp at Macon, Ga. The party leaving here was composed of Sec. Herman Nickerson, players Fred Mitchell and George Tyler, trainer Jimmie Neary, five correspondents and the official photographer.

In New York the party were joined by Maraville, Connolly, Cottrell, Russell and Bragg. In Philadelphia Magee and Cather were added to the troupe and Martin got aboard in Washington.

Edward Fitzpatrick, a young second baseman whose release was purchased from Toronto by the Boston Nationals, has refused to sign with the Braves until the Toronto club allows him a share of the purchase money. President McCaffrey is a stubborn fellow, and it is better than even money that Fitzpatrick shows up at Macon, after having handicapped his actions by his poor judgment at the very go-off.

Fred Tyler Traded. Pres. James E. Gaffney has been forced to break up what was intended for a little brother act by the Tyler boys. Brother Fred, catcher, figured on a trip to Macon, but at the last moment Pres. Gaffney made a deal with John Gausel to send Fred to the Rochester club, to be smoothed out before being given a serious trial with the Braves.

Red Sox Today. The first squad of Red Sox, headed by Pres. Lannin and Manager Carrigan, will leave Boston at 10 a.m. on Thursday and will arrive in Hot Springs, Ark. on Saturday afternoon. This means that the Braves will start their preliminary season nearly one week earlier than the Red Sox this year.

THE POWER OF THE BAND

Kipling Helps to Get Music For The New Armie "THE SOUL OF THE BATTALION"

A Story of a Cholera Camp in India and the Effect of the Regimental Band

At a meeting held at the Mansion House, London, a few weeks ago for the purpose of raising funds to provide bands for the new units of the British army, Rudyard Kipling delivered a speech on the influence of regimental bands on military efficiency. He remarked that the new regiments "were being born in silence, but that there is no reason why they should walk in silence for the rest of their lives. At present, unfortunately, most of them are obliged to walk in silence or to no better accompaniment than whistles, concertinas, and other meretricious but inadequate instruments of music which they provide for themselves." In the beginning this did not mean anything, but now more urgent needs to be met, but now that the new armies are what they are, we, who cannot assist them by speaking of their ranks, owe it to them to provide them with more worthy music for their help, and comfort and honor.

Speaking of the relationship of the band to the regiment Mr. Kipling remarked—"No one—not even the soldiers—can say for certain where the soul of a battalion lives; but the expression of that soul is most often found in the strains of a penny whistle and a body of 1,200 men whose lives are pledged to each other's keeping must mean some common means of expressing their thoughts and moods to themselves and to their world. The band can feel the thoughts of the regiment, and most of them I have known have been that—can lift a battalion out of depression, cheer its sickness, and steady and recall it to itself in times of almost unendurable strain. You will remember a beautiful poem by Sir Henry Newbolt describing how a squadron of "weary big dragoons" were led to renewed effort by the strains of a penny whistle and a child's drum taken from a toyshop in a wrecked French town.

"And I remember in a cholera camp in India, where the men were suffering very badly, the band of the 10th Lincolnshire started a regimental sing-song one night with that queer defiant tune, 'The Lincoln Poscher.' You know the words. It was merely their regimental march, which the men had heard a thousand times. There was nothing in it except—except all England—all the East of England—the fun and daring and horse-play of young men bucketing about the big pastures by moonlight. But, as it was given, very softly, at that bad time of terrible camp of death, it was the one thing in the world which could have restored—as it did—shaken men to the mind and rhythm for the body.

"Our new armies, as we know, have not been well served in this essential. Of all the admirable qualities they have shown none is more wonderful than the spirit which has carried them through the laborious and distasteful ground-work of their calling without a note of music except what that same indomitable spirit supplied—out of its own head. We have all seen them marching through the country or through London streets, in absolute silence, and the crowd through which they pass as silent as themselves for lack of the one medium that could convey, and glorify the thoughts which are in all men's minds today. We are a tongue-tied breed at the best, very softly, at that bad time of terrible camp of death, it was the one thing in the world which could have restored—as it did—shaken men to the mind and rhythm for the body.

"The Old Skipper—Don't you come tellin' me none of your cock-an'-bull yarns about waves 80 feet high. Why I've been at sea, man an' boy, for nigh on fifty years, and I never saw none higher than forty. The Young Skipper—Ah, but the waves 'as gone up since then!

CANADIAN WOUNDED BROUGHT TO SHORNCLIFFE

Eighteen From Front at Queen's Military Hospital ALL ARE DOING WELL

In Chat With Newspaper Man Say Life on Firing Lines is Far Preferable to Being Billeted Behind Them

(Montreal Gazette cable.) London, March 4.—Up the broad drive to the main door of the great white country mansion at Shorncliffe, which almost overlooks the Straits of Dover, and which now bears the name of the Queen's Canadian Military Hospital, there came this afternoon two ambulances. Out of these hobbled seven by the Canadian contingent, fresh from the blood-drenched fields of Northern France. Soon after their arrival they were greeted by others of Canada's army, who had made the like journey back to England between Saturday and Sunday. All of these are being tended by Doctors Stewart, Russell and Wallis, with a staff of about a dozen nurses, also from the Dominion, truly a striking colony of distress and sorrow established by Canada in one of the fairest corners of England.

Eighteen of Canada's soldiers have been brought from the front to this hospital during the week-end, and it may be said at once that these patients without exception, are going on well, and the good nursing and the tranquil surroundings, and will in every case probably recover their full measured strength before the duties appear on the big lawn before the hospital.

Your correspondent had the pleasure of chatting with several of these patients. One, comfortable in a room tenanted by two other stricken Canadian warriors, was forced to shake hands with his left. His right hand had received a dose of German ammunition. Surprised by Salpers.

"I went out with a party on the eighteenth composed of Canadians and men from two British regiments," he said. "A thick fog was on and we in the front line were doing well, most of them being able to sit around smoking and chatting. I asked them now they liked being at the front, and the answer of one man today to such a question will be endorsed by all."

Some British soldiers wear checkered boards in the form of knitted vestcoats with a checker-board design. When there is no active work to be done whole companies gather around two "cracks" to see them have it out.

J. H. Searle of Lowville, N. Y., crossed the continent in a box car, traveling as guardian of the biggest cheese ever made in the United States, made for the San Francisco Exposition. The cheese is seven feet six inches in diameter and four feet six inches high. It weighs about 1,100 pounds and was made of 105,000 pounds of milk by forty-six men in a building especially constructed for the purpose.
