On Monday night several small tobogganing parsies took place, at which there were no accidents and a great deal of enjoyment. I am told that Hailfax ladies are credited with having iron constitutions, so much do they accomplish in one day. And really such of them as attended the school of cook, ing on Monday morning from ten o'clock till nearly eac; walked home, drove, skated, or paid visits all the afternoon, and then tobogganed in the evening, deserve their athletic reputation.

The cookery school to the relief of some ladies and the sortow of others, came to an end this week. It has been a most successful undertaking in every way, and some credit reflects upon the management, of the committee. Miss Ormond (who by the way is an English lady not a Canadian, and is I understand related to an officer formerly of this garrison) has taken great pains with her scholars, and certainly possesses the gift of teaching to a remarkable degree. Her next school is to be held in Windsor, I hear she takes all her cooking utensils with her even to the kitchen tables used in the classes, which must make rather an item in the way of luggage.

The gabacribers to the private afternoons at the

The subscribers to the private afternoons at the rink were to have had a rink party on Wednesday evening of this week, but the prospect was given up, I believe on account of the expense. It is wonderful how rink parties run up into the dollars, and air ways seem inexplicable to an outsider. Of course the band is a large item at the outset, and if multed claret and whisky and sods are supplied in addition to the orthodox soup and sandwiches, the supperment cost a good deal. I hear that later on however a rink party will take place.

The great subject of conversation lately, among people who drive much, has been the terrific state of Halifax streets. I wonder if St. John can be as bad in this respect, for between the deep snow, the bumps (whose depths are quite tremendous), and the street car tracks—last but not least, the number of sleighs which have lately been upset is almost assat helief.

as selegies which marrowly escaped a bad accident on Mr. Bauld narrowly escaped a bad accident on Saturday last, and Dr. Curry's sleigh was among the aumber which capsized on Monday. A great deal has been said about the persistency of the streak car company in keeping their line running, but it seems to a person who depends a good deal upon trains as though the company deserved some praise for their determination in so doing:

praise for their determination in so doing.

I hear that Colonel Hill, R. E., will leave sooner than was expected, as his substitute has been appointed. Colonel Leach, R. E., will take his place here, and is, I understand, a very distinguished effect and has the Victoria Cross.

A great many people were very sorry this week to hear of the death of Miss Caroline James, who has for so long been known and respected in the community. The little school kept for so many years by the Misses James has been attended by almost all the members of the first families of the place for the past two generations; and the deceased lady will be remembered with kindness by many people to whom she gave their first lessons, long before the kinder garten was heard of.

Among late arrivals from England, was Mrs. Frier de Saone, who is making a visit to Mrs. Arther Morrow her daughter, and will afterward visit her son in New Glasgow. Among the passengers by the Labrador were Surgeon-Major Lees Hall, and Dr. Carleton Jones.

Mr. Stockwell, late Li-cestershire Regiment, is on his way back to Halifax, after spending some time in Chicago and the West. I hear also that the gold mine in which he is interested has turned out rather well.

Two well known citizens of Halifax intend moving in the coming spring to Montana. This seems rather a far cry from here, but I understand that noney is more plentiful in that part of the continent than here at the extreme eastern edge.

The cock fight so carefully arranged lately to misled the energetic secretary of the S. P. C. seems to lee regarded in many quarters its rather a clever schlevement. It has done one good thing however in drawing the attention of people to the fact that there is an S. P. C., and that owners of game cocks respect its power enough to take a great deal of palms to cvade it.

The S. P. C. is I believe greatly in want of funds; The S. P. To the ambiased observer it looks as though this were rather a blot on Halifax women able to afford the small subscription of a dollar a year, so much of which would be need be relieve and protect other women not in such fortunate circumstances.

half the evening with some girl who does not know the left bower from an ordinary court card. Then supper usually provided at euchre parties is of a modest description, and no man in his secret soul likes that. All these things being considered it is no wonder that at late euchre parties such difficulty has been experienced in getting men enough to play. A drive and a dimer are child's play to manage, when compared to a progressive euchre party.

The Red Cap Snowshoe Club have been having a bengit this winter in the way of weather. They have had more tramps in the past two months than in spine three years. On Saturday last some twenty of the club walked to Bedford, where they were joined by others more laxily inclined, and spent a remarkably cheerful evening after having an excellent dinner.

The club has a very smart and workman-like look in its marching order.
