

R.

- Refining of steel in electric furnace, 46, 47, 86-94, 132-135.
 Refractory materials, 17, 49-58.
 alumina, 52, 55, 56, 57.
 bauxite, 52, 55, 56.
 carbon, 8, 53, 55, 108.
 carborundum, 11, 54, 55, 56, 153.
 carborundum-fire-sand, 54, 55, 56, 57, 152.
 dolomite, 52, 87, 94, 113.
 expansion and contraction of, 50, 51.
 fire-clay, 49-50, 54, 55, 57, 98.
 graphite, 53, 54, 98, 142, 143.
 heat conductivities, 56-58.
 lime, 50-51, 55, 56, 57, 60, 61.
 limestone, 8, 61.
 magnesia, 8, 10, 51, 52, 55, 56, 57, 88, 94, 105,
 112, 113, 117, 129, 131.
 melting temperatures of, 49-56.
 porcelain, 21.
 silica, 50, 55, 56, 57, 171, 172.
 siloxicon, 54, 55, 56.
 Remscheid, Heroult electric steel plant at, 91.
 Report of European Commission, (see Haanel).
 experiments at Sault Ste. Marie, (see Haanel).
 Resistance electrical, 2, 15, 16.
 furnaces, 3, 16, 21-32, 75-78, (see also individual furnaces).
 pyrometry, 82.
 Resisting contents of furnaces, solid, 26, 32.
 liquid, 28-32, 72, 78.
 melting, 26-28, 32, 66, 69.
 Resistivity, electrical, 75.
 amorphous carbon, 77, 78.
 coke, 76.
 furnace cores, 24, 75-78, 144-152.
 graphite, 77, 78.
 molten metals, 72, 78, 101, 105.
 slags, 74, 78.
 Resistors of electric furnaces, 6, 16, 18, 21-26, 32, 73-78.
 Reverberatory furnace, 34-35.
 Reynolds, L. B., electric zinc furnace, 164.
 Richards, Prof. J. W., 39, 78, 92, 144, 147, 150, 153, 180, 194.
 aluminium, 6, 187, 188.
 furnace efficiencies, 36, 37, 156.
 metallurgical calculations, 34, 37, 40, 42, 43, 52,
 53, 56, 58, 125.
 Ries, H., New Jersey, fire-bricks, 49.
 Roberts-Austen, Sir W. C., thermo-electric pyrometry, 82.
 Rods, carbon, 2, 24, 144, 146, 149, 152, 153.
 Roehling, iron works, electric steel furnaces at, 99, 106.
 Rossi Auguste, J., ferro-titanium, 137, 138.
 Ruthenburg, electric furnace, 65, 145.

S

- Salgues, electric zinc furnace and smelting, 28, 161, 162, 171.
 Salt, electrolysis of, 170-179, 181-183.
 San Francisco, price of pig iron in, 121.
