

Dicentra spectabilis or **Bleeding Heart**, an old fashioned hardy perennial blooming during June and July and producing quantities of crimson and white flowers.

Gaillardia Aristata or **Blanket Flower**, a hardy showy perennial in shades of crimson and yellow, blooming during midsummer. Grown from seed or plant division.

Gypsophila Paniculata or **Chalk Plant**. A hardy, finely branched, delicately flowered perennial, flowers white, suitable for planting in mixed borders, flowers very desirable for bouquets.

Hemerocallis or **Day Lillies**. Hardy showy perennials which do well under a great variety of conditions, in mixed borders, flowering during June. Grown from plant division.

Iris or **Flag**, a short showy perennial in shades of yellow and purple, German and Siberian forms particularly desirable. Does well in a variety of situations. In many named varieties. Should be in every collection.

Lychnis Chalcedonica or **Maltese Cross**. Brilliantly flowered perennial, producing masses of scarlet bloom which appears during midsummer. Does well in a variety of situations.

Myosotis Alpestris or **Forget-me-not**. Dwarf perennial producing masses of delicate blue flowers. Hardy and a persistent bloomer. Grown from plant division.

Paeonia or **Paeony**. One of the best known and most hardy herbaceous perennials, which should be in every collection. Bloom large and showy, appearing during midsummer. Should be planted in deep, well prepared soil, and in a somewhat protected situation. Many desirable sorts which should be planted extensively. Grown from roots.

Papaver or **Perennial Poppy**. Hardy, early blooming perennials, Iceland and Oriental poppies best known forms. Oriental particularly attractive, in shades of scarlet and crimson. May be grown from seed or plant division.

Perennial Phlox. Very attractive late blooming perennials. Should be grown in masses which present attractive displays of color. Many attractive named varieties which should be planted extensively.

Rudbeckia laciniata or **Gollen Glow**. One of the best growing, late flowering perennials. Produces masses of showy yellow flowers. Does well in a variety of situations and should be planted fairly extensively.

Spiraea. Some of the herbaceous spiraeas do well and make attractive perennials. The spiraea filipendula, palmata and almaria are particularly good forms.
