

## MELOTTE CREAM SEPARATORS

have machine-cut gears turning on ball bearings which run under oil. They have no worm-threads or any other contrivance causing needless friction. The gear wheels are of high-grade steel, permitting reduction in their size and weight. The suspension of the separator bowl from the spindle is a decided and most important improvement on the old-fashioned plan, in which the bowl is balanced on top of one or more heavy worm-thread spindles held rigidly in position by two or even more bearings. For close skimming it is unexcelled. WRITE FOR BOOKLET NO. 3F.

Most ready-woven wire fences are not coiled, but are crimped or bent zigzag every few inches, because the looms can't coil it and get an even length of strands.

## London Coil Spring Wire

has a proper and equal degree of coil in every particle of its length, not a kink or bend in one place only; it is made from a special kind of steel, which is as hard as possible and still capable of being spliced.

LONDON COILED WIRE and a LONDON FENCE MACHINE will build a fence nearly one hundred per cent. better, for the money invested, than any other in existence.

## Kemp's 20th Century Manure Spreader.

**A CROP-MAKER and  
A LABOR-SAVER.**

J. M. LeMoynes, Director.  
Mr. J. L. Thornton, Barnston, Que.: Compton, Que., Aug. 19, 1903.

Dear Sir.—Some years ago I used two of the Kemp Manure Spreaders, which gave me the greatest satisfaction. I found the manure was well pulverized and evenly spread on the land. The result was an even crop. I have no hesitation in strongly recommending your Spreaders as one of the best labor-saving machines of the day. I consider that they are indispensable to good farming at present.

Yours truly, JOHN M. LEMOYNE, Director.
