The Steel Trough & Machine Co., Ltd.,
TWEED, ONTARIO.

Our Steel Hog Trough has proved itself a true success.—All right—just the thing—would use no other.—That's what those who are using them say. Clean; sanitary; durable.

A large fire-box. Tank directly over fire. Cooks rapidly. Saves fuel. Used anywhere. Safe as a stove. A necessity this fall with feed short. Price very reasonable.

100 PER CENT MORE VALUE OUT OF THE MANURE PILE

WOULDN'T you like to get all the value out of the manure—the only fertilizer produced on the farm?

There's an alarming waste in the way manure is ordinarily handled. It is an easy matter to get double the value that most farmers are now getting from it.

Don't let it lie in piles in the barnyard indefinitely, to ferment and burn up from a third to a half of its fertilizing content.

Don't allow the rains to drain and wash away into the streams the rich liquids that are so valuable for plant food.

Don't haul it out and throw it in piles in the fields to waste.

Haul it out as it is produced, when it is fresh, while it is in its most valuable form, while it contains all its fertilizing elements, and distribute it evenly and thinly so that the land will receive every particle of its fertilizing content.

The Corn King return apron spreader and the Cloverleaf endless apron spreader are both made exceptionally strong and durable. The operation of each machine is controlled by a single

lever. The quantity of manure to be spread is regulated by means of this lever, the range of adjustment being from 3 to 30 loads.

Certain features are peculiar to these two spreaders and not found on other spreaders, such as the vibrating leveling rake which brings the manure up square and level to the beater, and the driving of the aprons by applying power to both sides, thus avoiding binding, friction and twisting, with consequent breakage.

The wheels are made of steel with broad tires, and the front wheels cut under to permit short turning. The draft is as light as can be secured in any spreader which provides the necessary strength to sustain the proper working apparatus.

The Corn King and Cloverleaf spreaders are made in sizes to meet the needs of the users, and can be secured by calling upon the local dealer.

Call for catalogs and colored hangers illustrating and describing these machines, or write us for little booklet on wasteful practices on the farm, which you will be thoroughly interested in reading.

Call on our Local Agent or write nearest branch house for catalog.

Mica Roofing

For steep or flat roofs, waterproof, fireproof, easily laid, cheaper than other roofing. Send stamp for sample and mention this paper.

HAMILTON MICA ROOFING CO.,

101 REBECCA ST., HAMILTON, CANADA.

Take a Look at a Farm Fence Worth Building

Ideal is the recognized standard fence for Canadian Railways. Railroads build fences for permanence. Canadian farmers are buying more Ideal Fence to-day than any other make. They keep our two factories busy, turning out fence at the rate of 30 miles a day. You see this fence everywhere you go. You know there must be reasons. Just take a good look at it as shown above and read the argument for buying.

IDEAL FENCE

Looks strong, doesn't it? It is strong. It's made to last. All made of No. 9 hard steel wires, both horizontals and uprights. Heaviest fence wires used. It adjusts itself in extremes of temperature. That's why Ideal fence always stands up erect. The lock which is used at every intersection of wires is shown in lower left hand corner. Neither climbing over nor horning, nor crowding, nor anything else can make the wires slip. It is not a fence that gets holes in so cattle and horses can poke their heads in and hooves root their way through. You can't tell about the galvanizing from looking at the picture but look at the fence itself for that. More heavily galvanized than any other. Easy to build, fits any surface, hilly or level.

Is the Argument sound? People who have investigated it answer yes. That's why so many are buying it. Take a little time to think of the essential of good fencing before you buy. The Ideal has all of them. We know you'll want Ideal when you know about it. Write for our book about fencing, FREE.
