

A Brand-New Electric Toy

This is the Sayer Electric Engine, built on scientific lines and modeled after a modern Horizontal Corliss Steam Engine. The engine can be run in either direction and at different speeds by means of the controlling lever. It is the cheapest Electro Motor Engine made. It consumes but half an ampere of current (about the same as a miniature Battery Lamp). Two dry cells do the work. A small pulley on the Fly Wheel provides for running small shafting, etc. Every boy who sees it will want one and he can afford to buy it.

Price for Engine complete, less Batteries, \$1.00.

Mailed for 20c extra.
