

The Unrivalled Summer Medicine IS WELL KNOWN TO BE Dr. S. Townsend's Extract of Sarsaparilla.

WHICH assertion is endorsed by the following Testimonial from Rev. James Beattie Pastor of the Third Presbyterian Church, New Orleans, 15th July, 1850. Dr. S. P. Townsend—Dear Sir: I feel it to be both a duty and a privilege to say, that for several Summers past I have used your preparation of Sarsaparilla in my family with the happiest effects. Yours, etc. JAMES BEATTIE.

Halifax, January 2nd, 1851. MR. SAMUEL STORY, Junr. DEAR SIR, I am happy to inform you that I had an opportunity of perceiving the good effect derived from the use of Dr. S. P. Townsend's Sarsaparilla, in Mrs. Rebecca Robinson, of Shelburne, who was considered in a decline, having a severe Cough, with symptoms of Asthma. She took large quantities of COD LIVER OIL, but without any benefit derived from it; at my request she was induced to try your valuable Sarsaparilla, and am happy to say with great success. She has taken five Bottles, and is now able to go about her house as usual, before taking it she was confined to her bed and not expected to live. Your obedient servant, JOSEPH WAITERS.

LIFE AND FIRE INSURANCE. The Undersigned has been appointed Agent for the "TRENTON MUTUAL LIFE INSURANCE COMPANY OF TRENTON," United States, and having previously taken the Agency, received satisfactory proof of the good standing and respectability of the Institution, he begs to inform the public generally that he is now prepared to issue Policies for eligible fire risks at moderate rates of premium, and to receive proposals for Life Policies, which will be forwarded to the Directors, and if accepted, Policies will be immediately returned. The Capital Stock of the Trenton Mutual is now \$250,000, well secured in good productive Stocks, Mortgage on Real Estate, and Cash in Banks, and is doing a very large and as yet from its commencement in 1847, a very successful business.

In the Life Department they issued the first year, ending 1st October, 1849, 957 Policies—a number which very few Companies of long standing ever reached in the same time. The benefit of the mutual system in Life Assurance is very apparent, and is most favourable to all Policy holders in this Society, inasmuch as they receive a portion of each year's profits yearly, being deducted from the Premiums then payable, which are lower than any of the English Companies and not subject to stamp duty—all the particulars of which are fully set forth in the Pamphlets which the Agent has for distribution, who furnishes all blanks and every necessary information, together with the Medical Examiner's Certificate gratis. All persons intending to insure are invited to call on the Agent, who will give them every information. Rufus S. Black, Esq., M. D. is Medical Examiner for the Company. DANIEL STARR, Agent. Halifax, 15th June.

The Coaches or Wagons to be drawn by not less than two Horses, and a uniform rate of speed must be maintained at seven miles an hour, both in summer and Winter.

The Contract will be entered into and remain in force for five years, unless annulled by a notice of three months on either side. The Contractor will be bound to afford perfect security, to the Mails, and means to protect them against the weather. Ample security will be required for the due and faithful performance of the service, and parties tendering are to call themselves at the General Post Office, at the above hour, and must be prepared with the names of the parties who are to be bound to become bound as sureties, accompanied by a certificate, signed by two Magistrates, that they are in eligible circumstances, otherwise no notice will be taken of their Tender. Any further information which may be required, can be obtained on application to the Post Master General, A. WOODGATE, P. M. G. General Post Office, Halifax, 10 Sept. 1851.

The Tenders to state the amount in writing as well as figures. Halifax papers till 23d. sept

CARLETON'S Condition Powders for Horses and Cattle.

The changes of weather and season, with the change of use and feed, have a very great effect upon the blood and sinews of horses. It is at these times they require an assistance to nature to throw off any disorder of the fluids of the body that may have been imbibed, and which if not attended to, will result in the Yellow Water, Hooves, Worms, Bites, &c. All of which will be prevented by giving one of these powders, and will cure when disease appears, if used in time. They purify the blood, remove all inflammation and fever, loosen the skin, cleanse the water, and invigorate the whole body, enabling them to do more work with the same feed. The action of these powders is direct upon the secretory glands, and therefore has the same effect upon the Horse, Ox, and all other Herbitivorous animals—all diseases arising from or produced by a bad state of the blood, are speedily cured by them. Remember and ask for CARLETON'S CONDITION POWDERS, and take no others. Sold wholesale for the Proprietors in Nova Scotia at Messrs. Medical Warehouse, Halifax, in Windsor by Mrs. Wilkes in Dartmouth by H. Farrell; and by one Agent in every town in Nova Scotia and New Brunswick. Enquire for Camelsack's Almanack for 1852, which is given to all gratis. Sept. 6.

For Farmers.

GERMAN AGRICULTURE.

Each German has his house, his orchard, his road-side trees, so laden with fruit, that if he did not carefully prop up and tie together, and in many places hold the boughs together by wooden clamps, they would be torn asunder by their own weight. He has his corn plot, his plot of mangold wurtzel, or hay, for potatoes, for hemp, &c. He is his own master, and he, therefore, and every branch of his family, have the strongest motive for constant exertion. You see the effects of this in his industry and his economy.

In Germany nothing is lost. The produce of the trees and the cows is carried to market; much fruit is dried for winter use. You see it lying in the sun to dry. You see strings of them hanging from their chamber windows in the sun. The cows are kept up for the greater part of the year, and every green thing is collected for them. Every little nook, where the grass grows by roadside and river, and brook, is carefully cut with the sickle, and carried home on the heads of the women and children in baskets, or tied in large cloths. Nothing of any kind that can possibly be made of any use is lost; weeds, nettles, hay, the very goose grass which covers waste places, is cut and taken for the cows. You see the little children standing in the streets of the villages, in the streams which generally run down them, busy washing those weeds before they are given to the cattle.

They carefully collect the leaves of the marsh grass, carefully cut their potato tops for them, and even if other things fail, gather green leaves from the woodlands. One cannot help thinking of the enormous waste of such things in England—of the vast quantities of grass on banks, by road sides, in the openings of plantations, in lanes, in church-yards, where grass from year to year springs and dies, but which, if carefully cut, would maintain many thousand cows for the poor.

To pursue still further this subject of German economy. The very cuttings of the vines are dried and prepared for winter fodder. The tops and refuse of hemp serve as bedding for the cows; nay, even the rough stalks of the poppies, after all the heads have been gathered for oil, are saved, and all these are converted into manure for the land. When these are not sufficient, the children are sent into the woods to gather moss, and all our readers familiar with Germany, will remember to have seen them coming homeward with large bundles of this on their heads. In autumn, the falling leaves are gathered and stacked for the same purpose. The fir cones, which with us lie and rot in the woods, are carefully collected, and sold for lighting fires.

In short, the economy and care of the German peasants are an example to all Europe. They have for years, nay ages, been doing that, as it regards agricultural improvement, to which the British public are just now beginning to open its eyes. Time, also, is as carefully economised as anything else. They are early risers, as may well be conceived, when the children, many of whom come a considerable distance, are in school at six in the morning. As they tend their cattle or their swine, the knitting never ceases, and hence the quantities of stockings and other household things which they accumulate are astonishing.—H-well.
