To complete sets we can supply to members' volumes 2, 3, 4, 5, 6, 7, 9, 10 and 11 at \$1.00 each. Volumes 13, 14, 15 or 16 may be had for \$2.00 each. Address—

ACCOUNTANT

National Live Stock Records, Ottawa, Can.

The Thrash farm, this year, bred the highest-priced bull at Perth Show, and it is an understood fact that the Clydesdales are of the same merit as the Shorthorns. Something good is expected in this shipment coming to Canada.

Messrs. Jaques Bros., of the Suffolk Horse Ranch, of Lamerton, Alta., are importing more Suffolks. Jaques Bros. find a big demand for those horses, especially for stallions to cross on all kinds of mares. Their shipment will arrive in middle October.

The ram sale season in Britain is at its height, but prices are none too satisfactory from the seller's standpoint. The Argentine, during the past month, took 75 head at an average of £13 14s. 8d.; Australia, 20 at £19 4s.; New Zealand, 3 head at £16 3s. 4d., and Germany, 146 head at £10 19s. 3d., which figures give some idea of the selling price of rams in England for export abroad.

GOATS WANTED

A reader in Manitoba is inquiring for goats. Breeders of goats who have stock for sale are advised to communicate with this journal.

WHY SOME BOYS LEAVE THE FARM

Ever since we first heard the story of the Prodigal Son we have had a half-avowed preference for the older brother. He got up at four o'clock, built the fires, went down to the pasture and pailed the cows, swilled the pigs, and harnessed up a four-horse team before breakfast, while Wilfred Algernon was getting the tip end of his beauty sleep. When Dad went to town he brought Sam a collar for the bald-faced horse, and presented W. Algernon with a gold-inlaid watch, and when Ma visited the Ladies' Aid, Wilfred was elected coachman, while Sam drove a gang plow chariot over the rockiest piece of ground on the half-section.

After the pride of the family had struck out for himself, Dad presented Sam with his share of the property, at the same time giving him to understand that all title remained in head of the household. "It's your colts 'n' my hosses, time I get to sell 'em!" So the years passed by with Sam pushing the work to the limit, and Dad playing the part of a human shell-bark hickory.

Then one day after he had been turned down by the old man when he asked for \$2.65 to take his girl to the circus, Jim Peters came driving up the road and spread the glad tidings that Wilfred Algernon was coming by night stage, with a barrel and darkness for raiment, having lost his hog-herder's suit during a game of 'seven up' the night before. When Dad heard about it he rushed into the house and called up all the neighbors and ordered Sam to go out, as soon as he had had his supper, and butcher a pig, while he and Ma spruced up to meet W. A.

Sam struck. Can you blame him?

WATERING HORSES

Because a deep draught of cold well water occasionally produced colic or gripes in horses, our forefathers (taking their cue from the managers of coach teams) deemed it inadvisable to water first. The tired and sweating animal desiring water first, and more than anything else, was, and is still in many cases, obliged to chew with a dry mouth what he might enjoy if first refreshed by water, which acts as a restorative or true stimulant, when the blood has suffered loss of water by exercise and sweating and wear of tissue. Experiments too long to detail here, but carried out in a manner that leaves no doubt of their correctness, have demonstrated the fact that hay requires four times its weight of saliva to saturate it. Oats need rather more than their own weight, and even grass must have half its weight of saliva before it is fit to be swallowed and mix with the contents of the stomach during the second process of digestion. The first process begins in the mouth. Those great parotid glands under either

Horse Owners! Use

Office—CANADA LIFE BUILDING
WINNIPEG MANITOBA

Two young ladies boarded a crowded street car and were obliged to stand. One of them to steady herself took hold of what she supposed was her friend's hand. They had stood thus for some time, when on looking down she discovered that she was holding a man's hand. Greatly embarrassed, she exclaimed, "Oh, I've got the wrong hand." Whereupon the man with a smile stretched forth his other hand, saying: "Here is the other one, madam!"

Why Not Fill Your Body WITH NEW ENERGY

And avoid the weakness and tired feelings of spring—You can do this by using DR. CHASE'S NERVE FOOD

You need not be a victim of circumstances and suffer all the weakening and depressing effects of spring. Tired feelings, headaches, indigestion and nervous troubles all fly away when the system is flooded with rich, red blood.

Energy and vigor only come after all the ordinary wants of the system are supplied. Dr. Chase's Nerve Food is so wonderfully successful as a blood-builder that you soon begin to feel strong and healthy by its use.

By means of this great restorative treatment you can rebuild the body when it has been wasted by worry, overwork, lingering colds or the depressing and debilitating effects of spring.

There is no reaction after the use of Dr. Chase's Nerve Food because it is not a stimulant. On the contrary it is a blood-forming, system-building medicine which by working hand in hand with Nature proves of lasting benefit to the system and thoroughly drives out weakness and disease by filling the system with new energy and vigor.

Mrs. H. A. Loyne, nurse, Phillipsburg, Que., writes:—"I was all run down and could not do my own work. Everything I ate made me sick. In nursing others I had seen the good result of Dr. Chase's Nerve Food and resolved to try it. As a result of this treatment, I have gained ten pounds, do my own work alone and feel like an entirely different person." Dr. Chase's Nerve Food, 50 cts. a box, at all dealers, or Edmansons, Bates & Co., Toronto.
