

PNEUMATIC TIRES.

The impression that Pneumatic Tired vehicles were only experiments, or toys, has been fully dispelled. "Bike wagons" have come to stay, for city, town, or country driving.

This cut shows a section of the Dunlop Pneumatic Tire which we use on our No. 153. Note extra heavy tread. We use and recommend for general use this style of tire, because anybody can repair it anywhere. They are made in Canada and are liberally guaranteed by the local company to give satisfaction.

On our extra light Speeding Wagon, No. 155, we use the Genuine Hartford best Single Tube tire.

Pneumatic Tire Guarantee.

Pneumatic tires are guaranteed by the maker of the tire. Should a customer have occasion to take advantage of the following guarantee, the tire should be removed from the wheel, and sent direct to the tire manufacturer, charges prepaid. The following is the guarantee:—

"We agree with the purchaser of each tire, to make good by repair or replacement at our option, when delivered to us, transportation charges prepaid, any imperfection or defect in material or workmanship of such tire, provided that the imperfection or defect shall be referred to us before any claim for repair or replacement shall be allowed.

"This guarantee does not include the free repair of punctures or other injuries."
