

PAINT -- PAINT

Spring is the time for Painting. PAINT is as necessary to a House or any Building, as Bread is to the human being.

PAINT is a safe investment, not only from the fact that it beautifies, but that it prolongs the life of the building. Some may advance the argument, that PAINT is high and they will wait a year or two till it gets cheaper, from present market reports, and from those who are in a position to know, indications are that it will be a long time before it will be cheaper, and probably will be higher.

A building that needs Painting, if neglected, will deteriorate much more in value, to say nothing of the appearance, than the slight extra cost of PAINTING. The next question to decide is, what PAINT will I use? — Here is where we can help you solve the problem.
