His assistant—What makes think so?

The Iceman—People are beginning to call me "Mr. Smith." Haven't got anything better all winter than "I say, you!" or "Hello, there!"

On the Links. Miss Shapely (as she misses drive at the second tee and falls) Oh, Fred, come and help me up! know my ankle is turned.

Fred (looking down admiringly)
Yes, and mighty well turned too. AWAY OUT IN THE COUNTRY.

Away out in the country
Warre there is no clang and roat,
Where it's eight miles to the railroad
And it's three miles to the store,
There is peace and there is quiet;
Men are not contending there
For the powers that seem precious
To the greedy billionaire.

Away out in the country
Surely teamsters do not
Try
To run men down, unless they
Pass the crossing on the fly;
A schemer isn't waiting
Everywhere a man may look
To rush in and get his earnings
All away by hook or crook.

Away out in the country
Where the woods are full of joy,
And the hens are cackling loudly
At the sunburned farmer boy.
There is never any crowding.
There is room out there to spare,
And the people aren't breathing
Flying rubbish with their air.

Away out in the country
Where the Iliacs sweetly blow
People don't pay out a dollar
To behold a 10-cent show;
Men are not looked on with pity
Just 1: ause their clothes don't fit,
And the women don't go mourning
When the servants up and quit.

Away out in the country
Where the water's cool and sweet,
And the knife's a useful weapon
When the hungry people eat.
There is not the constant jangle,
Nor mad clanging that subdues
And distracts the city poet
When he seeks to court the muse.

Away out in the country
Where the funerals are few,
And the people keep apprised of
All the things their neighbors do,
Here and there some queer old fellow
May not hanker to put down
The tools the farmer has to use,
And move away to town.

MRS WILLIAM PATERSON.

Fine Qualities in the Personality of the

Mrs. William Paterson was born in tains, Pennsylvania, but is not of that account a citizen of the repub-lic, for her parents, Mr. and Mrs. T. C. Davies, were English, and when their daughter was still very young they moved into Canada and took up their residence at Brantford. 1863 Miss Lucy Clive Davies

MRS. WILLIAM PATERSON. Wife of the Minister of Customs. married to Mr. Paterson, then prosperous business man of that city. Mrs. Paterson may be describ ed as domestic in her tastes, and i the womanly art of the needle she is very deft. But she is fond of literature and of good music, and, though lack of time and strength have prevented her gaining a practi-cal knowledge of the fine arts, her judgment is well worth taking into account. She is interested in politics, as becomes the wife of a Cabinet Minister, but is still more inter ested in works of charity, in which she takes a larger share than is com-patible with her physical strength.

Bernhardt Paragraphed. Sarah Bernhardt recently took out a policy on her life for \$100,000 for the benefit of her son, Maurice, and to the various questions asked by the examiners the following teresting facts were laid bare:
The "divine Sarah" was born Oct.
23, 1844. She is 5 feet 6 inches
tall and weighs 130 pounds.

Her full name is Sarah Bernhardt Damala. She owns \$100,000 worth of real estate in Paris, and during the thearrical season she carns the idy sum of \$10,000 a week.

The only kind of liquor she drinks is one glass of champagne at dinner, and her principal food is the fresh pre-sed juice of beef. pre-sed juice of beef.
lier art occupies practically all her
time. When traveling, her staff consists of a female companion, a
seuse, two menservants, and two

She never wears stays, and the insurance examiners pronounced a most excellent risk.

Accounted For. "He looks so grave." "That's because

guished French naturalist, made thorough study. According to him, thorough study. According to long, pale green wings, like veils, its head upraised to heav arms folded and crossed on its give it a faise resemblance to a ecstatic devotion."

A feroclous creature files even commerce the growth pop of a commerce the growth pop of the contempor of the contempor

ertain to find prey.
"Posted on some bush near the burrows," says Mr. Fabre in his account of the insect, "It waits patiently until it sees some other insect, probably a sphex, returning home. By a sudden spher, returning home. By a student rustle of its half open wings it terrifies the approaching insect, which hesitates for a moment, and then as suddenly as a spring the toothed foreaum folds spring the toothed forearm back on an arm also toothed, and the insect is grasped between the blades of the jaws of a wolf trap close on an unfortunate wolf at the instant when it is eizing the bait. Then, without unclosing the deadly machine, the mantis owly eats its victim."

In Provence this cruel insect is known as "prego Dieou," which means 'pray to God.'

"The Deaf Mute's Story.
"The most pathetic story I ever heard," said Senator Hoar once, "was told by Professor Gallauder The pre-fessor had a favorite put a little deaf mute boy, exceptionally bright. Mr. Gallaudet asked him if he knew the story of George Washington and

the cherry tree.
"With his nimble fingers the little fellow said he did, and then he preceeded to repeat it. The noiseless ges-ticulations continued until the boy had informed the professor of the elder Washington's discovery of the mutilate ed tree and of his quest for

lator.
"'When George's father asked him who hacked his favorite cherry tree, signaled the voiceless child, 'George
put his hatchet in his left hand'— "'Stop,' interrupted the profess Where did you get your authority for saying he took the hatchet in his left-

"'Why,' responded the boy, 'be needed his right hand to tell his father that he cut the tree.'"

The difference between venom and a virus is very marked. Both are polsons and both of organic origin, but a venom is produced in secreting organs ommonly called poison glands, and is introduced into the system by means especially adapted for the purpose, such as stings or fangs. On the other hand, a virus is the result of disease or putrefaction and generally possesses the property of exciting in the system into which it is introduced the disease which produced the virus. A virus commonly produces little if any local commonly produces little if any local disturbance. A venom generally causes great pain, often severe inflammation and swelling. Venom has a marked lo-cal effect. Virus causes a general dis-turbance of the system.

Am Odd Habit Among Rooks that way that members of the same rookers have of intermarying generation after generation. The males always chook their, wives from among their an eighbors, and if one should be so that as to bring home to his rookers a brit from a distance the other rooks will wariably refuse to receive her and variably refuse to receive force the pair to build so force the pair to build some value in the neighborhood of big rooks outlying nests of this kind may all
