If the satelite gains the ascendency over the Mercury, there will be a terrible straining, and the Mercury will find itself embracing, without being able to help itself, the unfortunate Baby it so abhors, and which it has been sate to keep at arms' length up to the presunt time. If on the contrary the Mercury find that right is right, and can manage to smother the poor infant, we think it will not be long before the satellite, having reduced the loadstone as much as the regulate the bowls, putify the blood, remove the requirement of the contrary the Mercury find that right is right, and can manage to smother the poor infant, we think it will not be long before the satellite, having reduced the loadstone as much as having reduced the loadstone as much as

That is a nice little bit of poetry: "The little dogs and all: Tray, Blanche and Sweetheart; See they bark at me."

We have heard it before, and if the satelthe will just put "be" before the first
named dog it will be exactly suited to himself. It is the evident intention of the
satellite to draw attention away, from the
real question at issue to Mr. Wright, with
the hone of cetting his name brought into real question at issue to Mr. Wright, with the hope of getting his name brought into notice, but we cannot just now indulge this pardonable wish; feeling that Mr. Wright self, thus me has at any rate lost the respect of his former friends. The Mercury, in hopes, perhaps, of future assistance from its old enemy, has lost itself to brace up Mr. Wright. We wish them joy of seach other's friendship. each other's friendship.

THE ANGLO-IRISH QUESTION. Whatever may be the faults of Archbishop Lynch, of Toronto, and even the most ardent admirers of His Grace must admit that he is often extremely injudicious. One thing is certain, that when once he makes up his mind he is apt to speak his thoughts pretty freely, no matter whom his sayings may please or offend.

His Grace is an Irishman, and, of course, e all good sons of Erin loves his country.

Holloway's pills are admirably adapted for curing diseases incidental to females. At different periods of life women are subject to complaints which require a peculiar medicine; and it is now an indisputable fact that there is none so suitable for complaints of this nature as Holloway's pills. For all the debilitating disorders incidental to the sex, and in every contingency perilous to the life and health of woman—youthful or aged, married orssingle—this great regulator and renovator of the secretive organs and, the nervous system is an immediate cure. Their purifying qualities render them invaluable to females at all ages. They are searching and cleansing, yet invigorating; a few doses will speedily remove every species of irregularity in the system, and thereby establish health on a sound and firm basis.
