some enormous heads of wheat were berta Red are standing in stoocks in the fields all over the country. So heavy are they that the unsuspecting individnal finds difficulty in lifting them. Mr McNaught, has 20 acres on summer fallow. He sowed but 35 pounds of wheat to the acre and the stalks of grain are as high as the shoulders of an average man. This is the seventh year that Mr McNaught has sown winter wheat in this field after summer fallowing and an estimated yield of 45 bushels to the acre Granum, Aug. 14-Granum means is justified by the vields of previou wheat. Leavings might mean any old years. The first cutting of the distrio thing at all. That is the reason why this district has discarded the latter name McNaught was asked by Mr. E. Richard. and will appear as Granum on the re-vised issue of the map of Alberta. That the change is justified is shown by the Toronto. The C.P.R. land department manner in which Granum has loomed up in the public eye of late. The district loads, 3,000 sheaves in all, to be used for

town. The wide areas of idle lands

noticeable in many districts are not as

## What Clay Soil Will Do

J. S. Graves of Graves and Lindsay's tricts exhibits. This all goes to show that Granum "has the goods." The district is very large, comprising ten townships, the soil is unusually fertile, the farmers are energetic, and all that is ne-cessary is suitable wind and weather to record excellent and the blue clay from ten feet below the surface was scattered over the adjacent land. On this soil a large field which was sowed too thick grown, which are a great surprise to all who have seen them. "This shows," said

## Spring Wheat Stands High. Scores of farmers in the district have

hundreds of acres of spring wheat. That has a splendid field of 400 acres, tall and clean. J. S. Graves has 400 acres, E. R. Chugg 600 acres, James Brown 480 acres, J. McInnes 400 acres, J. Ellis 400 acres. Walter Morris 320 acres and John G Vosbourgh's farm as a sample of what taken a car-load of sheaves from Ma Vosbourgh's far mas asamples of what Alberta land can do. If the grain can escape subsequent frosts it will average from 25 to 30 bushels per acre and will
