

New Process Coffee
Easy To Make

Don't bother again with any coffee that must be "stuffed." The new process by which RED ROSE COFFER is prepared crushes the fragrant, fresh-roasted bean into even little grains, removes all husk and the yellow chaff that makes other coffees bitter so that in a few minutes the boiling water extracts this coffee's full, rich flavor, and it pours out bright, clear, and being "settled"—nice to see and fine to drink. Get a tin of Red Rose and do as the simple directions say.

You will be captivated by

FLASHING MESSAGES UNDER SEA; ACROSS THE CONTINENT

Winnipeg, April 15.—Another milestone in the history of the progress of international communication was passed yesterday morning when Winnipeg, by means of a clever invention by one of the engineers of the Postal telegraphic department, was connected with London, England, and many messages of a congratulatory nature were dispatched and received.

The first message flashed across the continent and over the sea to the mother country was sent, and replied to, at 12:25 Winnipeg time. The message and the reply only occupied a few seconds of time. The text of the message was as follows:

"Winnipeg, the hub of Canada, soon to be the center of the continent, sends greetings to the mother country."

To which London promptly replied: "Thanks and London, the hub of the world, looks with admiration at the hub of Canada."

J. McMillan, superintendent of telegraphs of the C. P. R. in Winnipeg, was present in the operating room, but the message was sent by Operator J. Holmes and Chief Operator Thomson.

At 12:10 yesterday, the operators in the room at the end of the continent, a successful communication had been established between Victoria, B. C., and London and the message which came through were read in this city.

The first message from London read: "London sends you greetings and congratulations on this circuit."

"We heartily reciprocate your greetings," was the reply.

The next message to pass over the circuit was from Premier McBride of British Columbia, to H. Turner, agent general in London:

"Greetings from Victoria, B. C., by direct telegraphic communication with London."

A message was also passed from British Columbia to Lord Strathcona from the Daily Province:

"Daily Province extends best wishes on the occasion of this direct communication from Vancouver to London by wire."

Winnipeg then put in direct communication with the metropolis, and the message exchanged.

Shortly before the communication was opened with the old country, the daily "time wire" was received from the "time wire" in the west at four minutes to twelve by one time every day, from the observatory at Greenwich, England, from which observatory the astronomer royal sends out the time every day, which is received at the observatory at the eastern terminus of the trans-Atlantic cable.

The letters, or rather the Morse symbols which make up the letters, were heard sharply, and it was hard for the ears of the appreciative audience who watched the operation yesterday to believe that the mechanism and reproduction of the sounds transmitted had been carried so far as the many thousands of miles land and sea, which separate Winnipeg from London actually represent.

Seven Race Horses Burned

Moose Jaw, Sask., April 15.—Early this morning it was learned that seven of the sheds at the exhibition grounds had been burned to the ground, and that seven crack race horses had been burned. The cause of the fire is at present unknown but it is expected big endeavors will be made to determine it.

Japs To Test Immigration Laws

Tokio, April 15.—The Japanese cabinet reported to the emperor today that President Woodrow Wilson's decision not to interfere with the California land ownership legislation makes it necessary for the Japanese to present a test case before the supreme court of the United States, proving that the Japanese are not of Mongolian origin and therefore are entitled to assume citizenship of the United States.

ROGERS' METHODS CORRUPT THE ELECTORATE

Many Are Said to Be Working in Vermilion Riding, Among the French-Canadians and Ruthenian Voters, Against the Premier's Candidature

WILFRED GARIPEY MAKES PROTEST TO AUTHORITIES

Asks That Government Take Steps to Protect legitimate Election Workers and Citizens; Several Arrests Are Expected

EDMONTON, April 15.—As election day approaches, the efforts of the Rogers gang of politicians to corrupt the electorate are more and more apparent throughout the province, and it is probable that during the coming week a number of arrests will be made by special constables sworn in by the provincial government to prevent election fraud.

Reports today from Vermilion and St. Paul show that the Rogers gang is maintaining in these constituencies, where they are directing their energies to the coercion of the French Canadian and Ruthenian voters.

Wilfred Garipey, who is contesting Beaver River constituency in the Liberal interest, wired from St. Paul today stating that Rogers' methods are being used in the Vermilion and Lac La Biche, and appeals to the provincial authorities to send immediate protection to legitimate election workers and citizens.

C. W. Cross, attorney general, intervened in regard to the matter said that necessary steps to protect voters were being taken, and he expected that some arrests would be made in Beaver River today, or on Monday.

The following is a copy of a letter from G. Mackay, from Garipey, and Mackay at once communicated with the attorney general.

"St. Paul, April 13.

"To A. G. Mackay, Edmonton:

"Rogers' methods being adopted in Vermilion and Lac La Biche, and you get provincial government to send through Athabasca Landing immediately to legitimate election workers and citizens?"

(Signed) "WILFRED GARIPEY."

Vermilion, April 14.—Several well-known Conservative heeler are working in this constituency. Two of the men have made themselves so obnoxious that voters who attempted to vote were being harassed by the Liberal headquarters, and asked that steps should be taken to prevent them from being harassed by the Liberal headquarters. Some of the men have been dismissed from their employment on instructions from Rogers' headquarters. A protest against the underhand methods of workers on the Conservative side, they will cast their vote for Liberal candidates.

Edmonton, April 14.—With the last few days of the election campaign, charges are being made against the Liberal party. According to instructions from the attorney general's department, two arrests were made of Conservative workers on Saturday. As Carmanagay a man named Schafar was arrested, and in the Acadia riding a Manitoba worker named Stevens was taken in charge. Both are charged with offenses under the election law, and the latter is also accused of giving liquor to interested persons in the riding.

W. Garipey in Beaver River, has asked the attorney general to send him names of agents and detectives who were forwarded to that point.

TRAGEDY OF STREET LIFE IS TOLD IN ASSIZE COURT

Vancouver, April 15.—A tragedy of street life took place in the assize court in which a young girl related the story of how she had been lured to a shameless life in the hands of a man who had lured her with it an added ingredient of self-destruction in the case of one of the principals under the girl and who has preferred death to appearing in the witness box to tell of his part in the affair.

The girl in the case was said to have been betrayed by Garry Ames, the convicted highway driver. Some time later he indicated her to accompany a man calling himself "Joe Smith" who announced that he had a deal of money. Smith missed a roll of \$100 and communicated with the police. Ames part in the business came to light. At the preliminary hearing in Colmar, a town in Alaska. One day another girl in the house fell ill with typhoid. A fortnight later two other members of the family were stricken with the same complaint. In the few weeks that followed there were eleven other cases.

The doctors were completely baffled for a long time, and then found in Ames a terrible example of a "bacillus carrier." Without the slightest ill-effect to herself she carried in her digestive system innumerable millions of typhoid microbes. The unfortunate girl, after being avoided like a medieval leproser, was isolated in a fever sanatorium. The Pasteur Institute, on hearing of the case, wrote asking her to come to its Paris headquarters for treatment; but only with the greatest difficulty were the railways persuaded to take her as a passenger.

Since her arrival here Dr. Metchnikoff and his assistants have made a thorough examination and have found her system saturated with the protoplasmic microbes, which is one of the chief causes of infant mortality, and which serves as a cover for the Eberth typhoid microbes and colon bacilli.

By careful treatment the protoplasmic microbes were sterilized after four and typhoid vaccinations.

At the Pasteur Institute, where Miss Jansen now has employment as assistant librarian, it is feared that the typhoid microbes, which will all ways probably remain in the girl's system in a latent condition.

The impression on the public of the case has been heightened by the slandering announcements of the well-known analyst, Dr. Reminax, who last year showed that the so-called antiseptic block passed over the chin by barbers after shaving simply served as an untried microbe vehicle.

Dr. Reminax has now carefully selected a barber noted for his scrupulous cleanliness and has made bacteriological tests of the various instruments of his trade. Although the barber was in the habit of washing his hands in hot water and every night the following results were obtained: 5,000 bacteria were found on a razor

BLUE & BLACK SERGE SUITS \$13.95

Wednesday morning in the Men's Section we shall repeat the special of a week ago, the only difference being that there are fewer suits to choose from, say 125 in all. Our assertion is that these blue and black suits are the best value at the price that you could possibly obtain.

The serges are woven at one of the best looms in Bradford, England. They're fast dyed, and of the finest finish. The coats are neatly tailored, the trousers of correct cut and will hang well. Every suit looks smart and dresy and should give thorough satisfaction.

If you are not satisfied after you have bought it return to us and we will cheerfully exchange or refund the money, sizes 34 to 46. Extra \$13.95 value at \$20.00. Wednesday only

EUROPE, TOO, HAS HER GERM CARRYING INDIVIDUALS

Paris, April 15.—It seems that Europe, too, has its "typhoid Maria's," who, while themselves in perfect health, spread all around the contagion of typhoid fever.

A short while ago Miss Jansen was the secretary of a business man at Colmar, a town in Alsace. One day another girl in the house fell ill with typhoid. A fortnight later two other members of the family were stricken with the same complaint. In the few weeks that followed there were eleven other cases.

The doctors were completely baffled for a long time, and then found in Miss Jansen a terrible example of a "bacillus carrier." Without the slightest ill-effect to herself she carried in her digestive system innumerable millions of typhoid microbes. The unfortunate girl, after being avoided like a medieval leproser, was isolated in a fever sanatorium. The Pasteur Institute, on hearing of the case, wrote asking her to come to its Paris headquarters for treatment; but only with the greatest difficulty were the railways persuaded to take her as a passenger.

Since her arrival here Dr. Metchnikoff and his assistants have made a thorough examination and have found her system saturated with the protoplasmic microbes, which is one of the chief causes of infant mortality, and which serves as a cover for the Eberth typhoid microbes and colon bacilli.

By careful treatment the protoplasmic microbes were sterilized after four and typhoid vaccinations.

At the Pasteur Institute, where Miss Jansen now has employment as assistant librarian, it is feared that the typhoid microbes, which will all ways probably remain in the girl's system in a latent condition.

The impression on the public of the case has been heightened by the slandering announcements of the well-known analyst, Dr. Reminax, who last year showed that the so-called antiseptic block passed over the chin by barbers after shaving simply served as an untried microbe vehicle.

Dr. Reminax has now carefully selected a barber noted for his scrupulous cleanliness and has made bacteriological tests of the various instruments of his trade. Although the barber was in the habit of washing his hands in hot water and every night the following results were obtained: 5,000 bacteria were found on a razor

Recalls the Great Constantine

Athens, April 15.—Constantine, the new ruler of Greece, four years ago and before that time, was most unpopular in his own kingdom, where today he is a hero classed with the ancient warriors of the historic land. The ruler for whom the Greeks all over the world, as well as in Greece, have been buying chaletas, swords, jeweled wreaths, as the liberator of the land from the thraldom of the Turk has heard outside the palace walls at Athens and at his own chateau of Thessalonica, the cry of the mob that he and his royal abdicate in favor of his own eldest son, Prince George; he has had the military leave of his own army and navy against him to the extent of mutiny; he has been impeached against in the parliament and publicly scored in the newspapers for political reasons.

Constantine, Duke of Sparta, eldest son of King George, was born at Athens, August 2, 1883. He was educated by tutors who were brought from Leipzig and one of the accusations against him has been that he was the effect of German influence. Tall, soldierly in appearance, quiet, reserved.

Watch Repairing of All Kinds—American, English and Swiss. Moderate charges, work legally guaranteed. Dickens, working watchmaker, 231 Eighth avenue, near "just below the Queen's." Phone 2440. Open till nine every night. Issuer of marriage licenses.

Between Canada and W. Indies

Ottawa, April 15.—The dominion government has authorized completed arrangements for an improved steamship service between Canada and the West Indies. The arrangement is a temporary one, the contract being for a year. The old service was provided by the firm of Pickford & Black with four boats, sailing from Halifax every three days, and calling at St. John, San Pedro de Macoris, and Santo Domingo. The new service will be provided by the government for the service was \$160,000.
