

MARSEILLES SITUATION SERIOUS!

18,000 Men on Strike and a Social Revolution Feared.

Movement in France to Suppress Religious Teachers—Queen Alexandra at Brussels—In the Philippines—Big German Loan.

Marseilles, March 23.—The city is quiet. The Cannebiere and other leading thoroughfares are patrolled by cavalry. The storekeepers are anxious and a majority of the stores are closed. The street cars have ceased running. Reinforcements of dragoons and infantry arrived here this morning from neighboring towns. The prefect has conferred with the military commander regarding the measures to be adopted in view of the serious outlook. It is estimated that there are now 18,000 men on strike, or thrown out of work on account of the strike. The strikers have stopped street cars in the outlying quarters and have smashed the essential parts of their mechanism. About 1,200 free laborers are working on the docks, strongly protected by the troops.

Yesterday's declaration of the council of the labor union and labor exchange in favor of a general strike and their issuance of an invitation to all unions to cease work has increased the gravity of the situation. The cabinet workers, the locksmiths, the engineers, the caulkers, the oil workers, the millers and the bakers' unions have either struck already or will do so shortly. A corps of military bakers from the neighboring garrison is being organized to replace the bakers on strike.

Bodies of turners and fitters proceeded to a number of engineering works and persuaded the employees to abandon their duties. Three establishments were forced to close. It appears that during the afternoon rioting the gendarmes fired not only in the air, but into the crowd. A child was wounded in the shoulder, and a number of rioters were also wounded. The disorders were due principally to bands of roughs, having nothing in common with the strikers, and these were responsible for the stoning and pillaging of shops.

Naples, March 23.—One thousand of the 2,600 dock laborers who went on strike here Tuesday in sympathy with the Marseilles strikers decided today to resume work, provided vessels from the south of France were not admitted to this port. It is expected that the local strike will end tomorrow.

CHAMBERLAIN LIBEL CASE.
London, March 23.—In the trial of the libel actions brought against the Star and the Morning Leader by Mr. Arthur Chamberlain, brother of Mr. Joseph Chamberlain, and Mr. Arthur Chamberlain, son of Mr. Arthur Chamberlain, in connection with charges bearing on war office contracts, the case of the plaintiffs was closed this afternoon after further cross-examination and re-examination of Mr. Arthur Chamberlain had elicited nothing of general interest. The defense will not call any witness. The case was adjourned till Monday.

IN THE PHILIPPINES.
Manila, March 23.—Insurgents have attacked and burned the ungarriooned village of Uguis, in the Province of South Cebu. A detachment of the 26th Infantry overtook and chastised the marauders. The Philippine 46th Volunteer Infantry, has captured eight insurgent officers and 215 men at the village of Ternate, in Cavite Province.

Bacolod, Island of Negros, March 23.—According to expressions of a large majority of the delegates from Occidental Negros, and a few who were present from the Oriental side, the sentiment of the people is overwhelmingly in favor of supporting the present government by provincial government.

IT IS THE WAY YOU USE IT.
It is the Method Employed Which Makes Success or Failure.
One man with pen, ink and paper can produce a landscape, another man with a pen and ink may not be able to write his own name legibly. It is all in knowing how.
It is equally true in the use of medicine. The same remedies we have today have existed for thousands of years, but if their existence was known the knowledge of how to use them was lacking.

They became valuable to the human race only when experience and science showed the way to use them to get results.
The grip is an old disease with a new name. It is really catarrh in character and the usual symptoms are those of acute catarrh, but the old-time catarrh powders, salves and sprays do not cure it, neither does the application of antiseptics through an inhaler give anything more than relief for a short time.

The antiseptics are all right; they will kill the germs of catarrh and grip if they are applied rightly, but their local application to the nose and throat avail little because the germs are in the blood and through the whole system.
Stuart's Catarrh Tablets contain many of these antiseptics, they are used in sprays and inhalers, but instead of applying them to the inflamed membranes of the nose and throat, they are taken into the stomach and thus reach the blood, the real seat of the disease, and drive out the infectious germs through the natural channels of the bowels and kidneys.

In other words Stuart's Catarrh Tablets reach the CAUSE of the mischief instead of merely local symptoms. The remarkable success of these tablets in curing grip, catarrh and throat and lung troubles is because they drive the catarrhal poison from the system and the nose and throat become clear of the excessive secretion of mucus, which causes the hacking spasm and gagging, because the secretion is not supplied from healthy blood.

Two years ago Stuart's Catarrh Tablets were unknown but today have become so popular through positive merit that druggists everywhere in the United States, Canada and Great Britain now sell them.

ments in both divisions. The reasons given for this view are that such a change will effect a reduction of taxes and of the high salaries of officials, the establishment of schools and the improvement of the roads. The speakers alleged that owing to a lack of means of education liberty was becoming license. The military commander is credited with having organized the only schools. They are taught by soldiers. Commander Taft assured the delegates that Negroes would be supplied with American teachers, and he outlined the need of organizing provinces uniformly with the other islands.

Washington, March 22.—Gen. MacArthur at Manila, under date of March 22, cables the war department as follows: "Hughes reports surrender of Pullon and command at Antique, Province of Panay, with 150 men. This ends the insurrection in Panay."

COMPOSER GUNGL SHOT.
Berlin, March 22.—Gungl, the composer of the opera "Attila," was shot on an electric car in Dresden yesterday by the divorced wife of a railway director. Gungl was the co-respondent in the case. His wound is not serious.

TO SUPPRESS RELIGIOUS TEACHERS.
Paris, March 22.—Comte De Mun (Conservative) made a notable speech in the Chamber of Deputies yesterday during the discussion of article XIV. of the law of associations, the purpose of which is to suppress teaching by religious orders. This provision is one of the most important of the bill, and its fate is deeply interesting to the middle classes and to the aristocracy, who largely entrust the education of their children to religious establishments. Comte De Mun declared that the proposition of the article simply implied a tyrannical state monopoly of education. "The delicate question of what doctrine should be taught to children," he said, "ought not to depend upon changing parliamentary majorities. Otherwise we may have the case of Jules Simon, who one legislature, no god at all during the next, and the true God for the following four years by a majority vote."

A RIVALRY OF BRAINS.
London, March 22.—Mr. Choate, the United States ambassador, in moving thanks to the lord mayor for presiding at the meeting which was in connection with the School of Economics and Political Science, said Americans regarded such schools as among the means of maintaining their position in the rivalry which they are maintaining, and meant to maintain with the sister nations of the world, especially with this country. Mr. Choate added: "It is a rivalry not of arms or of warfare, but a rivalry of brains, skill and courage in the great industries of life."

BRITISH BRIGANTINE WRECKED.
London, March 23.—The brigantine Rose was wrecked off Whitstable, Kent, Wednesday. Seven of the crew clung to the rigging. Four dropped off and were drowned after becoming mad with suffering. The others were rescued, terribly exhausted, after exposure of 30 hours.

QUEEN ALEXANDRA IN BRUSSELS.
Brussels, March 23.—Queen Alexandra arrived in Brussels this evening, traveling in the same saloon car used by the then Prince of Wales at the time of the attempt upon his life by Spillio. All the curtains of the train were drawn. The British minister to Belgium, Mr. Peppes, presented a bouquet to her majesty, and the train then proceeded for Copenhagen.

EXTRADITION OF BANKRUPTS.
London, March 23.—The under secretary for foreign affairs, Lord Cranborne, in the House of Commons today, informed a questioner that the government had several times endeavored unsuccessfully to arrange for the extradition of offenders against the bankruptcy laws of the United States and Great Britain. Clauses had been inserted in the draft of a treaty which was under negotiations in 1884, but the United States had not accepted them. Similarly in 1889 the British cabinet headed by the Imperial Bank had taken over an imperial 3 per cent loan of \$5,000,000, which will be issued early in April.

CABLE NOTES.
The French Chamber of Deputies has adopted the commission's report in favor of the prosecution of M. Jaurès, the Nationalist deputy, who is reported to have attempted to corner the sugar market in Paris.

The Japanese House of Peers is still discontented with the financial proposals of the government and has rejected a portion of the budget. The two houses of parliament are conferring, with a view to a solution of the problem.

Advices from Seoul, capital of Korea, announce that the Korean cabinet crisis which arose out of the arrest of the acting minister of finance, on the charge of having plotted to murder a number of the ladies of the imperial household, has been settled, and that one official has been beheaded.

Serious inundations have occurred in the northern part of Italy. The river Po caused damage along the valley, while the provinces of Bergamo, Alexandria, Venice and Lucca have large tracts submerged.

In connection with the riots in St. Petersburg the prefect has issued a decree forbidding meetings and assemblies in the streets and squares, persons infringing this legislation are liable imprisonment for a term not exceeding three months and a fine not exceeding 500 roubles.

THE BLIND NOW SEE
Delicate Surgical Operations Restore the Sight of Two Men Blind From Childhood.

Baltimore, Md., March 23.—Valentine Botz, of Buffalo, N. Y., has had his sight restored to him as a result of a surgical operation performed in this city, after having been totally blind for 28 years. Mr. Botz is 32 years old, and has been blind since 4 years of age, from the effects of smallpox, which left him with spots on his eyeballs. He was operated on by Prof. A. Douglas McConachie. A delicate incision was made behind an eyeball and a piece of caustic flesh removed. Instantly light flashed into the ball, and Mr. Botz saw his deliverer, the first person he had beheld for 28 years. Oscoda, Mich., March 22.—Blind from his birth and 22 years of age, Clarence Bacon this week for the first time beheld the face of his mother, having received the sight of one eye as the result of an operation performed at Ann Arbor. The young man is a piano tuner, having received his instruction at the school for the blind at Lansing.

THE COUNCIL OF WOMEN.

Annual Gathering of the London Branch.

Interesting Report Presented by the Recording Secretary Mrs. Yarker—Last Year's Officers Re-Elected.

The principal feature of yesterday's annual meeting of the London branch of the Council of Women was the report of the recording secretary, Mrs. Emma Yarker. Other satisfactory reports from various committees were also read. The gathering took place in the Y. M. C. A. building. Among those present were Mesdames Broomer, Bremner, and others. The recording secretary's statement:

Owing to the short time which has elapsed since the last annual meeting of the National Council in July last, the London Local Council has not a long record of new work to offer, but it can report, and it does so with thankfulness, a good deal of steady progress along the lines of the National Council effort, which it had already accepted as its programme last year. Its affiliated societies are with us still, all doing their utmost to carry out the programme of the National Council. The delicate question of the future of the National Council was discussed, and the London Local Council was urged to support the National Council in its efforts to secure a permanent home for the National Council. The London Local Council was urged to support the National Council in its efforts to secure a permanent home for the National Council.

It gives us much pleasure to state that with the exception of a small sum, under \$100, the whole amount \$5,000, needed for the building of the children's wing to the Victoria Hospital, will have been raised by the women of London, and provided, waiting-room, sun-room, store-rooms, etc., furnished and complete. Several children have been taken from time to time to the hospital, and all who have visited them have been fully satisfied with the result of the long and persistent labor entailed upon those who have helped to build the children's wing.

It is with a pardonable pride that we make mention of the fact that the ladies' advisory board appointed by the Local Council at the request of the hospital trust last year, has done such good and helpful auxiliary service, that its reappointment has again been asked for, the recording secretary of the Local Council being its secretary.

The Children's Aid Society has made a rapid stride in the purchase of a large house and grounds, where its work can have wider scope than in its former small house. The value of this society is recognized by all.

Your secretary would like to have been able to report a successor to Mrs. Broomer, whose three years' term of office as recording secretary of the board had just expired, but because no women candidates offered themselves this year there is no reason to be pessimistic about the future.

Our Local Council is satisfied that its representative, in spite of the limitations of her position, did her very utmost to urge upon her co-trustees the value of the teaching of domestic science in the public schools, with the satisfactory result that, although on economical reasons, the attempt to introduce it could not then be made, yet the school board, by resolution, duly adopted the proposition, and in doing so this most necessary teaching for our girls will find a place upon the school curriculum.

These of us who followed the career of our woman trustee were ever-welcome and honored spectators of her vote, and her always keen sense of responsibility in casting it.

Our Local Council is very anxious to secure the co-operation of its affiliated societies in the effort of our Young Women's Association to have a suitable building of its own. Hitherto it has been, as it were, a mere dweller in tents. To this end "all hands must be lifted."

The London Local Council indorses the propositions laid before it by the N. C. executive for general co-operation, and desires to record its appreciation of the prompt action taken by Lady Taylor, the president, in sending loyal messages to England in the name of the National Council of Women during the late momentous crisis in the history of the empire. If there is anything more to be done of which we should be proud to make special mention, it is the high commendation bestowed by those competent to judge of its merits, upon the Handbook of Women's Work compiled by the council, and the effort of which, although it is not within the province of your recording secretary to fore-shadow any of the varied and instructive programme which the council has all the while been venturing on, needs to be

when the members of the National Council honor us by their presence there will be no lack of hospitality either on the part of the citizens of London or of the Local Council of Women who have invited them.

The officers for the ensuing year were elected and the president, Mrs. H. A. Broomer, thanked those who assisted in obtaining signatures to the address to the National Council, and the address to the National Council in May were submitted and approved, and the formation of the committee of arrangement for that meeting was left in the hands of the officers.

Dr. A. Campbell gave an interesting paper on consumption, and presented figures from official reports of deaths in 1899 to substantiate his statements. Of 23,700 deaths, 3,400 were from tuberculosis—that is to say one death in every eight was caused by consumption. From the ages of 50 to 60 there was something like \$500 deaths, and this number 2,500 died by consumption. He said that the opinion of medical men had been that this disease was hereditary, but the researches of eminent men had changed their views, and it was now thought to be communicable. He explained how the disease might be contracted and the unfortunate position in which the consumptives were placed. The great necessity for places for consumptives was shown, and he urged upon those present to use every possible means to have this disease abated.

Dr. Niven spoke on the same subject. He showed the necessity of absolute separation of consumptives from healthy persons, and the importance of bringing every possible means to bear for the establishment of hospitals for consumptives, and how the danger of infection could be reduced.

Mr. C. B. Edwards advocated the formation of a historical society. He considered the importance of bringing every possible means to bear for the establishment of hospitals for consumptives, and how the danger of infection could be reduced.

Dr. Niven spoke on the same subject. He showed the necessity of absolute separation of consumptives from healthy persons, and the importance of bringing every possible means to bear for the establishment of hospitals for consumptives, and how the danger of infection could be reduced.
