

DOMINION MILLERS' CONVENTION

The Meeting Yesterday—A Series of Resolutions.

A meeting of millers and grain and flour shippers was held at the board of trade rooms yesterday. David Fleming of Brantford, president of the Dominion millers' association presiding. The object of the meeting was to take into consideration the advisability of doing away with the credit system in the sale of flour and to endeavor to devise some system to protect shippers and purchasers of grain of short weight.

Sir William Howard said the question was one of the greatest importance to the milling trade. They all condemned the credit system, and felt that it was an enormous one, which resulted in the loss of the trade. He moved the following resolutions: "That in view of the unsatisfactory nature of the credit system, it is recommended that we agree to adopt for ourselves, and to recommend to the trade in general, the system of cash for grain, leading to the abolition of the credit system and the ownership of the property until paid for."

Resolved—That the way companies doing business in Ontario, be requested to place a scale for weighing grain at all their stations from whence grain is shipped.

Resolved—That the millers and grain shippers pay a reasonable charge on shippers for the weight of which is ascertained by this method, and that a committee be appointed to confer with the shippers and to obtain their assent and cooperation, and further

Resolved—That in the meantime until such provision is made by which the weight of grain may be ascertained in the hands of the shipper and receiver that we do not unconditionally agree to the same until the condition that is set out at the point of destination within one-fourth per cent of the bill of lading weight. And that the foregoing resolutions be published in the public newspapers.

Resolved—That the millers and grain shippers pay a reasonable charge on shippers for the weight of which is ascertained by this method, and that a committee be appointed to confer with the shippers and to obtain their assent and cooperation, and further

AN IMMENSE DIODESE

More than a Thousand Miles Long and as Many in Breadth.

The bishop of Moosehide, whose residence is at Moosehide, on the shores of the Hudson bay, has arrived in Montreal from England, after an absence of eighteen months. While in England he succeeded in raising \$40,000 toward extending missions to the natives of his diocese, which is 1200 miles long and the same number of miles broad. There are four great tribes of Indians in the territory, spiritually presided over by the bishop, and these people have made considerable advances in the teachings of civilization and Christianity.

The venerable bishop has been thirty years in the Hudson bay territory, and his missionary work has been for several years in the higher dignity of overseer of the work of a number of faithful missionaries under him.

The bishop's trip was made in a canoe. The Indian population is so great that a mail from Canada, and the outside world generally, only reaches the settlements and arrives at year.

One ship per annum arrives at year. The Hudson bay company's stationers are six hundred missionaries laboring in the diocese, to which there is an addition of one more, who is coming out shortly from England. Two of those now engaged are natives.

THE WATER COMMITTEE

The Lake Extension Progressing Satisfactorily—Water Main to be Laid.

Ald. George M. Evans presided at the waterworks committee yesterday. Dr. York and S. F. Wilson said in paying their water couple of hours late in having the 50 per cent refunded to them. This was not done, however, as it was against the law. N. Westerson was charged full rates for using a hose on his premises and he also asked a reduction which was not given.

The committee concurred in the recommendation of the waterworks committee to accept it. The Union, Loan and Savings company complained that there was a mistake in their water rates but the engineer said they were correct and nothing was done. The engineer reported that 1100 feet of water pipe had been laid in the lake this year and their only remaining time is a satisfaction with the work.

THE SPORTING WORLD

The scholars and teachers of St. Matthew's Sunday school, Riverside, had their annual picnic yesterday at Victoria park.

Major George S. Leland, the well-known hotel man, died at the Sturtevant house, New York, yesterday.

Kath's paper mill at Turner's Falls, Mass., has been damaged by fire to the extent of \$80,000.

Yale fever has broken out at Brownville, Texas. One death occurred from it at New Orleans Tuesday night.

At Leavenworth, Kansas, during the emancipation celebration, Hagen shot and wounded two men. He resisted arrest and was mortally wounded by a policeman.

The Chilian minister at Washington has withdrawn the note not agreeable to the United States government which he sent to the secretary of state.

By an accident at a slate quarry at Mouson, Me., yesterday, Evans Jones and his partner were killed. Fred Ellis, N. Y. never has broken out at Brownville, Texas. One death occurred from it at New Orleans Tuesday night.

Mr. Blake and his Prospects. From Le Monde Moderne. Mr. Blake has done a bold thing for his party in abandoning all opposition against protection in principle. He will meet with no doubt, opposition in his camp, but his friends and partisans will finally accept the situation. There is no doubt that this will turn to their common advantage in clearing their road from the principal obstacle which prevents them from arriving at power.

There is no doubt that this will turn to their common advantage in clearing their road from the principal obstacle which prevents them from arriving at power.

OUR EMBASSY

The Canadian Office in London—Improvements Devised.

A gentleman who has just returned from a business trip in Europe has deposited several times to visit the office of the Canadian government in Victoria chambers, Westminster, and came away with a very decided conviction that several improvements might very well be made in the manner of our embassy to the mother country. It seems that while Sir T. Galt is absent, and no other Canadian representative is in the office, the office is administered by his secretary, and the office there does not seem to assist much of their knowledge or zeal.

A man has made up his mind to emigrate to Manitoba, and comes to the office to see the Canadian consul. He is a merchant, and he is not likely to get much advice in any other way.

This instance can be added to the notice of our informant, and under the notice of a very creditable state of things, especially at a time like the present, when thousands of emigrants are leaving their homes and going to whatever place is best served by their own agents. The suggestion is made that the officers at Victoria should be made to inform others, and both able and willing to turn themselves heavily into the work of turning out more of the tide of emigration toward Canada.

Mr. Smith and his staff. It is announced that Professor Goldwin Smith will shortly visit Winnipeg. The professor is a well-known name in Canada, and his visit is expected to be a very profitable one.

THE BRITISH LEON'S GROWL

Buffalo News: The snubbing Canada has received at the hands of the British cabinet is presumed to suggest that home rule for Ireland is not likely to distate the views of the British cabinet.

Whiskey in the Can. Every Saturday a number of the redmen visit St. Thomas, and by some means best known to themselves obtain a supply of liquor. Of late the police have gathered in several of the redmen on every visit, and the Indians attracted to the fact that the whisky is sold in the open air, and the bottles sticking out of their pockets. On Saturday last the officers were surprised to see a half a dozen redmen, and among them one of whom were provided with coal oil cans. One of the redmen finally became disorderly, and was marched to the lock-up, where all in the vicinity were told that the can contained about three quarts of whiskey.

FOR THE RAPID AND PERMANENT CURE OF CATARRH

Which is not a "patent" medicine or "advertising" doctors' humbug, but an honest remedy, discovered by an English Physician of forty years standing, and which absolutely cures this hitherto incurable disease in from one to three treatments, no matter whether standing one year or forty years.

TO BE HAD ONLY OF A. H. DIXON & SON,
