PROF. SMITH, of Wittenberg College, Recommends Cleveland's Superior Baking Powder, and condemns the use of Ammonia in Baking Powder.

This is to certify that I have examined Cleveland's Superior Baking Powder, samples of which I purchased in open market, and that I can recommend it as a good, wholesome, and unadulterated article. It does not contain ammonia, an ingredient of many baking powders, and one which I regard as highly objectionable, since it seriously impairs digestion. I have examined biscuits baked with an ammoniated powder, and have found, as has been repeatedly declared, that the ammonia was still there. Cleveland's powder gave the amount of pure carbonic acid claimed for it by the manufacturers. EDGAR F. SMITH, Ph. D., F. C. S.,

have determined to seek election as your tative in the House of Commons of Canada. My reasons for so doing are as follows: I am deeply impressed with the fact that the young men of Canada are not repre-sented in Parliament in proportion to their numbers, intelligence and their interests in the country, owing partly to the machine system of party politics by which individual liberty is crushed out of the people, and partly to too much indifference and a lack of indeendence on the part of the young men them

I believe that the majority of the electorate of East Toronto desire that elected, lend my influence in favor of the enacting of such laws as would preserve and augment the usefulness of the following the support of every party and augment the usefulness of the following the support of every party and economical government.
