

Machine Construction & Drawing.

(From *Collin's Elementary Science Series*.)

We regret that we have been obliged to postpone the lithographing of the plates referred to in this work until its completion. They will all be supplied in the last two numbers of this year's volume, and properly indexed, so as to be easily referred to when bound. This work is alone worth more than the cost of the Magazine itself. Next year we shall give further instructive matter of a similar kind, but on separate illustrated sheets.—EDITOR S. C.

THE NEW POST OFFICE, TORONTO.
