FIFTY THOUSAND PERSONS
Die annually in England of Consumption. In the New England
States, the proportion is one in four or five. In Boston, probably
one in four. In the city of New York, sixty-seven died in two
weeks in December of this disease. It is less prevalent in the
more northern latitudes, as Russia, Canada, and among the Alps
of Switzerland, where the winters are long and severe, and there
are fewer sudden changes.
No theory can be more welcome to the human mind than the
one which establishes on good grounds the hope for prolonged
existence, if the allegations of those who are at least entitled to
veracity may be believed, there is a preventative and a remedy.

DR. WISTAR'S BALSAM OF WILD CHERRY.
Which has been before the public some ten years. This valuable
medicine was first discovered and introduced in the year 1838,
since which time its success has constantly increased the demand
until it has become one of, if not the most popular remedy for
Consumption, in its incipient stage, ever known.
