The extent of the foregoing list, and the number of new districts into which the good work of our grand Association has penetrated, show the vast progress it has made during the past two years. Every member of the C.M.B.A. must rejoice over this advance, must rejoice to see that so many of our Catholic fellow-countrymen are placed in a position to reap all the benefits, religous, social, fraternal and financial, which it gives. With the blessing of the Holy Father, so benignly given to us on the occasion of the Convention of the Grand Council in Montreal, with the paternal care and advice of our Grand Spiritual Adviser, the distinguished prelate who now rules over the Archdiocese of Toronto, and who is, himself, a member of our organization, with the sympathy and encouragement and advice of the Cardinal, Archbishops, Bishops and Priests throughout the Dominion, many of whom are members, we should feel that our Association has a special work to perform—that to us, indeed, should especially belong the watchword "pro-

gress." That the office of Deputy is a very important one in the government of our Association, I need not point out. The care with which the duties of the office are set forth in the Constitution shows the value attached to its worth. I have every faith in the zeal of those who have accepted the office. I commend them to the good-will and fraternal regard of the Branches in their respective districts. I look for co-operation with them, on the part of the Branches—the same co-operation and loyal support which would be given to the Grand Council, or Grand President.

Brothers, our organization is now complete. It is now our duty, one and all, to settle down to work. New Branches, new members, in larger and large numbers, must be the order of the day, so that the time will not be long delayed when we shall see at least one Branch in every parish in the Dominion.

Yours fraternally, JOHN A. MACCABE, Grand President. Ottawa, Oct. 20, 1890.

It atrong bakers the market is steady at the reduced rates for old wheat brands which are still held at \$5.75 to \$5.55, and new wheat flur at \$5.40 to \$5.50. Ontario millers are exporting their winter patents to England where they can realize better returns than by shipping them to this market. Regarding the Newfoundland trade, circulars received by llast mail state that the imports of flour to Newfoundland to date of circular amounted to 261,000 bris, grainst 190,000 bris for the corresponding period last year, showing an increase of 62,000 bris. A letter from Newfoundland states that there has recently been scarcely any demand there, owing to the miserably web weather of the past six weeks, but says the correspondent:—"There will be a rush at the last just prior so the close of navigation." Another writes from Sh.John's speaking of 'dull trade, says:—"Even the whisky shops miss their customers, and that is the surest sign of bad trade." This writer closes by saying:—"Still raining and all savage." Freights to Newfoundland are 300 par brifor flour with an occasional shading to induce engagements.

In bags we quote \$2 30 to \$2.40 for ordinary and \$2 45 to \$2 55 for granulated.

Whear—Receipts during the past week were 145,649 bushels, against 271,869 bushels for the week previous. We have heard of no further unaness on spot since the sale of the two cargoes of No 2 white winter wheat at \$103 delivered here. Other holders ask \$1.07 to \$108 and have put the wheat into store rather delivered here. Other holders ask \$1.07 to \$1.08 and have put the wheat into store rather than accept less. In Manitoba wheat efferings of No 2 hard have been made at points west of Toronto at \$1.12 per bus. Very little wheat however appears to be coming out of farmers hands, and all effered is being absorbed by millers, which is only about sufficient to supply the demand. Sales have been made in Manito ba at the wide range of 50c to 550 per bushel for frosted up to 80c for No 1 hard.

CORN.—R ceipts during the week were 1,077 bushels, aga nst \$60 bushels for the week previous. Car loss are quoted at \$67 to 58 to duty paid and at \$600 in bond.

OATS - Receipts during the past week were 39,819 bush Is against 49,618 for the previous, The market continues easy under liberal receipts for the season with sales in car lots reported at 41c to 42c per 32 lbs for Upper C suada and at 39c to 49c for Lower Canada. The quality of the latter and Eastern Ontario is very unestisfactory.

BARLEY -Shipments of byrley are still going forward from Poton and vicinity to the United States the prices paid being 60c per bushel, and one report says that as high as 55c has been paid. Sales of Canadian barley are said to have been at 95c in Rochester. A later despatch from Owego appears to be in opposition to the above; it says: "The demand is wholly for Western barley, as Canadian is to high, No. 1, 94c and No. 2, 90c. Here the market is stagnant, as maleters are expecting lower prices. Last week reveral lots of barley were shipped to the Touted Strate via St. Johns P.O. Here the United States via St. Johns, P.Q. Here we quote prices nominal at 60c to 70c for malting, and 45c to 50c for feeding.

RYE—The market is quiet but steady at 63c to 55c real breakly

to 65c per bushel.

MALP—Further sales for Fastern shipment have been made at 80c to 90c per bushel. SEEDS—Advices from Toronto state that farmers are looking for high prices for their cluver ared, and that Western buyers appear to be anxious to know what dealers can pay, but as we stated last week the season is too early for business, we quote red clover seed here at about \$5 per bushel.

### PROVISIONS.

PROVISIONS.

PORK, LABD, ETC.—Receipts of pork during the past week were 871 bbis. against 278 bbis for the week previous. A fair seasonable demand exists for pork, and a few shipments are being made to Newtoundland. Sales of Chicago mess have been made at \$13.50 to \$13.55 ci.f., St Johns, Newfoundland. A fair amount of business transpires in American clear pork at \$16.50 to \$17, the inside figure having been shaded for round loss. Canada short cut is scarce and firm at \$18 in jobbing luts. The market for Canadian lard is firm and prices range from 8c to \$40 per lb in pails, small lots range from 8c to 83c per lb in pails, small lots

marker from Sc to Sic per lb in pails, small lots being ic mars.

Canada short cut clear, per bbl, \$17.50 to \$18 00; Chicago short cut clear, per bbl, \$16 50 to \$17 25; Mess pork, Western, per bbl, \$16 70; Hams, city cured, per lb, 12c to 18c; Lard, Western, in pails, per lb, \$2c to 18c; Lard, Canadian, in pails, per lb, \$3c to 58;; Bacon, per lb, 10c to 12c; Tallow, common, refined, per lb, 55c to 6c.

A few small bunches of light hegs are being received for butchers' use which have sold at \$6 50 to \$6 75 per 100 lbs, heavier weights being quoted at \$6 25, but the latter are not yet wanted.

### DAIRY PRODUCE.

BUTTER—Receipts during the past weck were 3 944 packages againss 4,478 for the week previous. There is very little export enquiry, only a few low of Western having been picked up at 140 to 14½ for selected on Newfoundland account. A lot of Kamoura-ka is reported sold at 14½c, one lot being reported at 16c. Oleomarystine continues to go forward to Newfoundland on through shipment, recent transactions having been made as 9c per plund of f. So Johns. It is therefore d flicult for plor butter to compete with such a low price substitute. There is a fair local demand for choice Eastern Townships sales of fall ends having Eastern Townships sales of fall ends having bean nade a 185 to 20c, but off graves are ex-been nude a 185 to 20c, but off graves are ex-ceedingly difficult to sell although they from by fur the greater portion of the trock held here. There is a good deal of dairy buster brought into the city on farmers' waggins at present from the northern sections, and this considerably interfers with the require lead depend from the north-resections, and the considerably interferes with the regular local demand, some of our commission houses complaining of the greater portion of their trade being cut off by farmers sales at the markets. In creamery we have just heard of the sale of 600 packages of choice at 21½c for export, and it is reported that some buying is going on in the country at 220 to 22½c at the factory for choice September and October. We quote:

For choice selections of single packages 1c to 2c per lb more is paid.

CHEESE.—Receipts during the past week were

Chess.—Receipts during the past week were 31,248 boxes, sgainst 47,655 boxes for the week previous. The market continues in the same dull condition as reported last week. Dealers here are not disposed to accept lower figures, and it is thought that if factorymen continue so hold off they will propably he able to stop priors from receding to a lower basis. Advices from the west state that considerable cheese has changed hands in the Ingersoll and Belleville sections at about 10c in the former district, and at 9½ to 10c in the latter. In order to sell on this markes to-day it would be difficult to get over 10c for fancy Western September. At the same time if an order for the same class of cheese had to be filled, it is a question if the stock could be secured under 10½. It is said that there are only about 300 boxes unsold in the Napanee and Belleville sections, and that there are only about 300 boxes unsold in the Napanee and Belleville sections, and that there are only about 300 boxes unsold in the Napanee and Belleville sections, and that the Napanes and Belleville sections, and that the French section has disposed of a good part of the balance of season. Ingersoll, London, Brockville and Coruwall sections, however, are said to hold most of their September and October goads. English huyers are still stubbornly holding off, and many factory-men appear to be determined to follow the same

We quote as follows :-Finest colored, 10t to 10½c; tinest white, 10c; fiue, 9½c to 9½c; medium, 8½c to 9a; inferior, 6c to 8c.

Limed eggs are in good supply and a few lots have been placed at 16c and 162c. There are different reports regarding the results of the late shipment of eggs to England, some being mentioned as satisfactory while others claim there is no money in the business. Some talk 75 6d on the other side and others 10s 6d net here, a pretty wide difference.
