

have been appointed prosecutors in surgical anatomy. They are at home to their friends every evening in their room opposite the Bone Museum, and Mr. Laird will demonstrate the dissection of the face to limited classes when desired.

The first regular meeting of the Medical Society was held on Friday evening in the north lecture theatre, and was a real success from every standpoint. The attendance was about one hundred, and this, owing to the nature of the subjects discussed, was mainly of Senior students. At subsequent meetings other topics which will be of interest to the Juniors will be brought forward, although the paper given by Dr. Peters was of the highest interest to every man who heard him, and anyone, from a Freshman to a Senior, was able to comprehend the subject and its treatment at least sufficiently to appreciate the importance of the results in the cases cited. The paper was a resume of the history and treat-

ment of four cases of extrophy of the bladder, which had been brought to Dr. Peters for operation. His first case was represented by a little boy who had been a puny weakling and a burden to his friends, but who was a picture of health as he stood upon the lecture table before the society. The address of Dr. H. B. Anderson upon arterio-sclerosis was the thorough discussion of the subject expected from one of Dr. Anderson's experience and study. Appealing strongly to the Seniors, for whom it cleared away many difficulties, its technicalities were Greek to the first and second year men present. Musical numbers were given by Messrs. J. J. Cameron and M. Cameron. The Executive is to be congratulated upon the inaugural of what had been so long desired, a students' meeting at regular intervals for the hearing of papers upon medical topics, and for the discussion of matters of interest to the undergraduates in view of the profession upon which they are entering.

THIS CUT REPRESENTS THE EXACT SIZE OF THE PEN READY FOR USE

OUR \$1.00 FOUNTAIN PEN IS A MARVEL.

IN durability, finish and appearance it is equal to the more expensive fountain pens in the market. It is made of hard vulcanized rubber. It has no shoulders and thus it is smooth and pleasant for the fingers to hold. The cap, fitting on the barrel instead of below the ink joint, does not in removal tend to loosen or tighten the ink joint, it also acts as a protection against breakages and always fits either end of the holder equally well.

It has a 14 karat gold nib—with a platinum tip and can be had in fine, medium or stub point. One of the most distinctive features of this pen is the feeder.

It is so constructed that it overcomes the trouble of overflowing or dropping ink, especially when the holder is nearly empty, and has a smooth uninterrupted flow.

We will guarantee this pen to be in perfect working order, as all pens are tested before leaving the house. Put up in a neat box with filler and directions.

Mailed to any address in Canada, post paid for

\$1.00

If, after trying this pen, you are not entirely satisfied with it, return it and we'll refund your money.
