

Stanley Machine

R.R. #1
Parry Sound, Ontario
Canada P2A 2W7
Tel: (705) 746-5875

Contact: Simon Stanley,
Manager

Products Manufactured

Hydraulic trailers for power- and sailboats up to 40 feet (12.2 m)
• Steel and aluminum runabouts and workboats from 14 (4.3 m) to 40 feet (12.2 m).

Trade Names

Stanley, Uni-Lift

Company Summary

Stanley Machine started in 1975 as a full-service repair facility and commenced manufacturing all-welded aluminum and steel commercial and pleasure boats in 1981. Custom hydraulic trailers followed shortly thereafter. Stanley's boats and barges are custom built to all-original designs and are U.S. Coast Guard approved. The company plans to expand its facilities to accommodate the building of boats up to 60 feet (18.3 m).

Branch Offices

Rolls Battery Engineering,
8 Proctor Street
Salem, Massachusetts 01970
(617) 745-3333

Products Manufactured

Marine batteries for six, eight and 12-volt systems for commercial and pleasure craft.

Trade Names

Rolls, Surrette

Current Export Markets

U.S.A.

Surrette's deep cycle marine batteries develop greater capacity and can withstand more abuse than all-purpose batteries.

Company Summary

Surrette Battery Co., established in 1959, produces a complete range of marine, industrial, deep cycle and railroad batteries. Over the years the company has developed a marine line that encompasses more sizes than are offered by any other company in North America. Ninety per cent of the company's product line is related to deep cycle batteries, which develop greater capacity and withstand more abuse than any others. Until 1978, Surrette was a Canadian parent company with an American subsidiary. In 1978 the subsidiary was sold and there is no longer any connection or working agreements between the two companies. In 1984, Surrette entered the U.S. market with its marine line, under the trade name Rolls to avoid any infringement of trade mark rights with the U.S. company.

J.J. Taylor & Sons Limited

60 Advance Boulevard
Brampton, Ontario
Canada L6T 4J4
Tel: (416) 791-1765

Contact: Gary Bannister,
President

Products Manufactured

Fiberglass cruising sailboats from 25-1/2 (7.8 m) to 38 feet (11.6 m).

Trade Names

J.J. Taylor

Current Export Markets

U.S.A.

Company Summary

In 1904 the first J.J. Taylor yacht was launched in Toronto, Ontario. Many fine wooden boats ranging from sedan cruisers to sailing yachts followed. During World War II, the firm turned to military products such as aircraft pontoons and sub chasers. Over the years the company has built more than 500 J.J. Taylor Contessas in fiberglass. J.J. Taylor 26s and 32s have sailed every ocean in the world and both have completed solo circumnavigations. Two 32s were selected as training vessels for the Canadian Coast Guard. The company has been selected as the builder of a new George Cuthbertson design: the J.J. Taylor 38 is designed to be the ultimate 38-foot (11.6 m) cruising experience.
