As I said before, this is not a complete list but I think it is a pretty good sample of the corporations which the directors of three banks control, and this is only three out of ten. Through interlocking directorates these men control the bulk of the industry of the country. Through industry they largely control advertising, and through advertising they can if they wish control most of the press. Credit is necessary in every business to-day. Bankers can put any company or organization out of business by refusing credit at a critical time.
