Representative Men From Many Points Meet at Exhibition and Are Amazed.

SIGHT-SEEING WEATHER

Clouds Keep Extreme Heat Away While Visitors Inspect Expansive Grounds.

Friday's attendance 54,000 Same day last year 51,000 Gain to date over 1917.... 8,900

more thousands of people Still visited the Exhibition yesterday and cook advantage of the moderate wea-ther to make a thoro inspection of the buildings with their rows of in teresting and instructive exhibits. The sun remained in the background, only sendion its rays between the riffs in sending its rays between the rifts in the clouds, and as a consequence there was no extreme heat to take away the desire to see every corner of the extensive grounds or cause fatigue. It was really a pleasant day

the exhibition, and many, who view have learned the advantage of shade when attempting to study the spe-cial displays, were on the grounds cial displays, were on the grounds early and made a day of it. The crowd was of the moving variety. The people did not stay long in one

The people did not stay long in one place. In many respects it was a business-like crowd, intent upon learning something new or following up latest progress in this or that branch of industry. The cattle judging attracted its largest crowd, among which was a good sprinkling of farmers, who, by the way, are becoming more numer-ous at the fair, as the harvesting is concluded back on the land. Return-ed golders were on the grounds again. ed soldiers were on the grounds again in fairly large numbers, and it was not uncommon to see motor cars load not uncommon to see motor cars load ed with men unable now to get around themselves as they used to do before they went to France to fight. These men are given full sway and appear to be enjoying the sights

and appear to be enjoying the enjoying the selection immensely. Lake Was Choppy. Weather conditions were not favor-able to motor boat racing, so that the first races scheduled for 2 o'clock were not run. The wind from the east made the lake rather too choppy. There was, however, a good average There was, however, a good average crowd for the afternoon performance in front of the grand stand, and again the playing of the French Trench Band was greatly appreciat-ed. Today offers the final opportu-nity of hearing this heroic organiza-

A great centre of interest is the

Production and Conservation Production and Conservation Day, the day that is more closely ted with this year's Exhibition motto, "Produce and Save," than any of the other twelve, will bring the first Saturday afternoon crowds, and if the atten-

dance does not take a big jump it will be a keen disappointm There are many reasons why today's crowd should be

booster. The great spectacle is running smoothly, and critics have declared it the most thrilling entertainment they ever saw. Hon. N. W. Rowell, president of the privy council, will speak from the main band stand at 5.30 this afternoon.

This is the last day to hear the famous French band.

PROGRAM FOR SATURDAY,

Production and Conservation Day.

model playground, and yesterday, everyday, the school children had a splendid time playing, swinging, and otherwise enjoying themselves. Crea-tore's hand was heard by thousands music lovers again, and its popularity seems to increase with each ap-pearance. Prior to their afternoon pearance. program the Imperial Concert band gave a splendid program, playing,

a nong other selections, the overture from William Tell, by request. Because it was Press Day, newspapermen from all parts of Ontario met at the press bureau, filling in the time between sight-seeing trips by renewing old acquaintances. For them

it was indeed a happy day. At noon they were the guests of the Exhibi-tion directors at luncheon, and again at 5.30 they were escorted to reser vations under the grand stand, when

the evening meal was served and an address was given by M. O. Ham-mond, recently appointed chairman of the Ontario press, news and feature committee in connection with the Victory Loan campaign of 1918. He

explained the plans for press pub-licity thruout the province. In the evening the newspapermen in the evening the hewspaperment occupied reservations in the grand stand and witnessed the speciacle. Britannia Militant. Those of the gen-eral public who might be classed as early birds were standing in line waiting to pass into the grand stand at 4.30, and soon after opening time the stand was filled. Their cheers were proof that the stirring appea presented by the spectacle was reach-ing deep down into their hearts.

INDIAN SCULPTURE

Thru the courtesy of the United States National Museum at Washington, the Canadian National Exhibition is exhibiting one of the finest educational groups of Indian sculpture ever shown. It represents a scene in a home of the cliff-dwellers, before Columbus discovered America. These people built their homes under cliffs or on high protected spots, and built them, many storeys high, with good

heavy stone walls. In the room shown, the young man has just come into the home thru the curious-shaped doorway. The mother is squatting grinding the corn into r, and the grandmother is at work making pottery, and a few fine speci-

mens that are probably at least 1000 years 1d, are lying beside her.

The old man is working a drill to make some disc beads out of turquoise. The advantage of exhibiting such a group as this lies in the fact that most people remember what they see much better than what they read or hear about. So in a glance we have the opportunity of seeing what was America's original relation to the great agricultural problem

EMERGENCY HOSPITAL IS VERY BUSY PLACE

The white emergency tent at the Exhibition is having the fence which surrounds it painted green and the drawn-back curtains show the door open to all who may need ministrations.

Minor complaints of the visiting public keep Miss A. McCullough, the patient and kind-hearted nurse, busy, but yesterday there were no serious casualties. Children's Day was reported as being the most trying of the fair up to the present. Tooth-ache, headand one instance of slight ptomaine poisoning were reported yes-terday. The doctors in attendance are Dr. Adam Wright, Dr. Harper Nel-son, Dr. Arthur Wright and Dr. C. Watson.

with your advertisement on it, deliver same in 3 or 4 hours. These cases are already made, in long and short fold, and with celluloid front. The cost of these to advertisers is very low. Orders filled promptly. Anstey & Bromley, 77-79 Peter St. Adelaide 5380.

found on the first street east from the press building, just north of the grand stand, and is attracting many interested visitors. Products from the salient centres of the north, are divided into four sections under the headings, Timis-caming, Algoma, Rainy River and Thunder Bay district. The entire exhibit is of a quality to surprise those who have hitherto believed that nor-thern Ontario is the land of ice and snow, where grains, vegetables and fruit which are commonly grown in the temperate zone are almost pro-

hibited. The size and quality of the samples grown in the soils of the various districts, are such as to give and other interesting scenes. a strong negation to such suppo

Chuffer came first in the final of the few parts of Canada are more profood, than the northern part of the

Still another claim is made which dissipates the idea of an altogether rigorous climate. Those in charge of the exhibit are able to tell the visitor that last year winter was not as severe as in places south, nor was there as much snow as fell in Toronto Generally the display is an illustration which is calculated to dispel many preconceived impressions, and

to show northern Ontario in the light of a part of Canada that is highly productive in the things that make A MOTOR PROPELLER

for prosperity and domestic comfor From Thunder Bay.

Taking the section in which the Thunder Bay exhibits are tastefully displayed, fine potatoes of several varieties are on view. The smooth-skinned white "Irish Cobbler" species would satisfy even the son of the Emerald Isle, who is accustomed to whitest and meallest of tubers. The Ohio Red is another fine variety Here also are the Carmen M. and the Green Nut, which is very much sought after for home consumption. Flax which today is becoming more and more an article of special importance in the industrial world is "good" in

the eye of the expert. Alfalfa too is a fine crop, promising the best of fodder for the stock of the northern farmer

The Prelude and Marquis variaties wheat, both of which were given their name by Professor Saunders, as

In spite of the government's food regulations Christie, Brown Co., Ltd., well as samples of Huron wheat, are found in the display. Oats are represented in the samples of O. A. C. No. 3, Daubeney and Banner. Grasses are plentiful, as is shown by the specimens of red top, blue point and specimens of red top, blue point and Kentucky blue. Pasture is reported as abundant. The cultivated grasses are all here, timothy, Browne, western rye and millet. Clover is shown the red and alsike varieties. There

are also samples of peas, rye, wheat, barley, oats and corn, all of most creditable appearance. All the vegetables in every day use are here. Turnips, carrots, beets, parsnips, cucumbers, marrows, cab

bage. Fruits are well represented in their native state and preserved fruit of strawberries, rasp-berries, black and red currants and plueberries. That the dairy products are not neglected is seen by the fine exhibit of creamery butter from the Govern ment Experimental Farm at New

Lisgar. Jrdging by the exhibit, northern Ontario, it must be conceded is one of the most promising sections of building, at the main entrance. Canada in which to settle. This exhibit of the department of

lands, forests and mines, colonization department, is very creditable, and should be seen by all visitors to the Exhibition.

velopment that has taken p this important industry. The exhibit, which is in the forest products sec-tion, in the railway building, is very, in the process building at the Exhi-bition and understand how some peo-ple car always get the party they want because they live where the "central" is done away with and the interesting, it shows the growth of spruce, illustrated by live trees taken spruce, illustrated by live trees taken from the Reforestation Nurseries, and the products from the log right down to the finest paper. It gives in a graphic way an idea of the process. Other sections in the Canadian Nor-thern exhibit are devoted to the na-tural products of Canada, including minerals and accounting. In the secautomatic system of telephones used. This system is also installed in many large, manufacturing plants to connect up the departments. With the automatic enunciator system a big voice calls thruout all the rooms in a building that "Mr. Smith is wanted at the phone." How much simpler than having the switchboard girl have ninerals and agriculture. In the section devoted to travel there is an interesting machine never before used in Canada, showing dissolving views of the mountains of British Columbia,
