Our product is essential—just as essential as food. It IS BETTER than anthracite coal. Wedo not require to spend a dollar to find a market for our output—the demand is greater than output capacity can ever be—and as a direct "from factory to consumer" industry, all the profits go to the shareholders. As between the cost of our product and \$1.00 per ton profit—which is a very small margin in proportion to coal profits—the earnings of our present plant capacity will enable a dividend of approximately thirty per cent. But-

When you further appreciate that in these provinces of Ontario and Quebec there are over thirty cities that will be manufacturing our product and that this company will not only receive \$5,000 to \$250,000 from each of these cities for the rights to manufacture under our patents, but will receive Montreal, Aug. 30.—A man who said a royalty of \$1.00 per ton on every ton sold—you must appreciate the wonderful possibilities that

he was on his way to Egypt called at detective headquarters here Saturday night and left money and cheques to the value of \$1,900 with Sergeant of Detectives Lamont for safe keeping.

Consider now the multiplying values of the stock in addition to the dividends. Today this stock can be purchased at \$5.00 per share—a few days hence it may advance to \$25.00. The city Detectives Lamont for safe keeping. He explained he was a stranger to the city and he had heard so much about pickpockets, highway robbers and thieves in Montreal that he did not additional city increases the value of the stock in proportion to its size and output.

Now can you not appreciate the opportunity we offer? There is no other industry on the continent with a wider range of possibilities, and we doubt if ever again the public will be given an opportunity to get into such an industry "on the ground floor."

Be wise today—and get in before the advance.
