

Christ's kingdom are being removed one after another, and when there is an ever-intensifying longing after truth among the nations, we will earnestly pray that God may dispose and qualify us individually and collectively, to do the work He has assigned us, and that He may manifest His Spirit to all people, and fill the whole earth with His glory.

COMMITTEE FOR 1878-79.

E. ROBERTS.	J. Williams.
W. C. BEER.	J. Pickard.

REPORT.

The age in which we live is remarkable for the great progress made in our knowledge of physical science, and a general possession of intelligence among the people at large. The days of mediaeval darkness have passed away, and the disposition to inquire after truth, possessed by the early reformer, has passed, from the few, to the many. In all branches of scientific and secular knowledge, new discoveries are being made. The chemist in his laboratory; the meteorologist in his signal service station; the astronomer in his observatory; the agriculturist in his ploughing and

seeding; exploring to the light. The knowledge of nations through literature, paper.
