Why the Valve Jar is Superior to all Others for Preserving Fruit.

1. Because it is the only one in which the contents can be securely fastened, and cooked while thus fastened, without risk of an explosion.

2. It is the only one that is automatically Sealed, therefore, the only Self-Sealing Jar in the market.

3. It is so simple that no skill is required to use it successfully.

4. It is securely fastened when placed in the kettle, and being immersed, the fragrance of the contents is confined in the Jar, a more perfect vacuum produced and the handling of the hot jars entirely avoided.

5. It is well known that fruit Jars which are closed with rigid fastenings burst by fermentation, and the effect upon the closet and surrounding is well understood by many housekeepers.

The Cover of the Valve Jar, by having a perfect safety valve makes an explosion impossible, and entirely obviates every difficulty that exists in other fastenings. For sale by F. & J. A. WHITE, 10 Charlotte St., St. John.
