Promoting Temperance in a Practical Way.

The New York Herald of 2nd inst. gives the following report of the opening of a free ice water fountain in New York. : -"Free ice water by the Business Men's Society for the encouragement of modera tion" is the inscriptions placed over an ice water fountain that was publicly unveiled, yesterday, in the presence of several hunreds of persons of almost every condition . of life. From this time henceforth ice water may be found flowing in abundance and given freely to all who desire so cold a drink at the first outer alcove, beyond the main entrance on the Park Row side of the General Post Office. The fountain has an attractive and neat appearance, is made of white pine wood, lined with galvanized iron, and has four silver-plated faucets, a copper-lined drop trough, a capacity of eight barrels, is 3 feet wide, 5 feet long and 2 feet 8 inches high, and cost the donor Mr. F. B. Thurber, about \$450. An attendant, and a special policeman will always be in attendance, the one to "hand the drinks" and the other to take care of "the drunk and disorderly." Arrange ments were made yesterday for the public opening, which was announced to take place at five o'clock in the afternoon. A temporary platform was erected on the side of the fountain for the speakers, and the several orators were about to make their way to it when the clouds burst forth ference to the new Legislative Building at | in a downpour of rain, and the gentlemen Fredericton, for which Wm. A. Lawlor, ran to the interior of the Post Office for shelter. As the storm threatened to be of "Work is being pushed forward on the long continuance it was decided that the Provincial Building with alacrity. The building when finished, for design and Office lobby. The platform was brought general arrangement will scarce have an within the enclosed space, and on it imequal in the Province. In prospective, a mediately stepped Mr. F. P. Earle, the brief sketch of the building may not be president of the society, who explained to ninteresting.

"The structure occupies nearly the time had blocked every doorway in the same site as the old building, but-covers | neighborhood, and had thronged the corriconsiderably more ground and is much dors immediately adjoining, the object for higher. The measurement across the front which the assembly had gathered. He is 140 feet, and the depth of the building, said that the introduction of a public free including the portico in front, is 162 feet. | ice water fountain was a novelty in the The height from ground to main stone city, and he believed that it was the first cornice is 48 feet, to the mansard roof 64. feet, to top of central projection 75 feet, States. He then called upon Mr. Hadand to the top of the finule of dome 144 ley, the secretary of the Business Men's feet. Beside the central, there are two Moderation Society, to speak. This gencorner projections, which extend some 4 | tleman stated that the object in placing feet each out from the main wall. The the fountain in that neighborhood was to height of the corner tower cornices, which give to those who desired to obtain a glass are also of stone, is 68 feet, 83 feet to the of pure ice water an opportunity for getroof. The portico in the centre, over the | ting what they wanted without price, and without any of the temptations that they posing in design, having a total width of would be subjected to if they were com-

21 feet, and standing out from the building a distance of 11 feet. The columns, four in number, are of polished granite, of the Wine and Spirit Trade Society of 1 foot 8 inches in diameter, standing on America, next ascended the platform and grey granite plinths, surmounted by stone | was greeted with considerable applause urns, which add much to the effectiveness | and many smiles. He said that he must or the design. The grey granite steps acknowledge his inability to see the mofrom the ground, on three sides, are seven | tive which propipted the chairman to call in number. Overhead is the iron cresting | upon him to mak on that occasion Ho was one of those who did not believe that water was always the best liquid to drink, ite, three courses (6 feet 6 inches) in (Laughter.) Yet he was of the opinion height, with 9 inch batten. In the base- that the ice water fountain in the immediment is the steam-heating apparatus, ate neighborhood was a very excellent inwhich warms all the rooms and halls.

All the external walls are of finely tooled

He meant those who did not know when they had had enough of a stronger and a "There are three entrances at the front, better liquid. (Applause.) To those men under the central and side towers. The there was only one refuge, and that was right hand doors, while giving access to a total abstinence and ice water, but that

intended as an entrance to the ladies' gal-lery on the northern side of the Assembly Mr. F. B. Thurber was received with lery on the northern side of the Assembly room. The left hand entrance leads to the cheers. He said that the idea of the founcourt rooms at the east end. The central tain originated in a casual conversation, a spacious vestibule, with circular, niched be duplicated in other parts of the city corners, in which statuary of appropriate In so crowded a thoroughfare it would be design are placed. This vestibule leads found, he thought, very useful and in the into the grand hall, octagon in shape, on the same floor, twenty-three fect in use of intoxicating drinks.

number of lesser apartments, are specially even must be partaken of in moderation.

diameter and connected with a circular | Mr. Earle declared the fountain opened hall at the rear of the main body of the and invited the multitude to "Go and take building, twenty-two feet in diameter, from a drink." The invitation was accepted which the main stairway ascends to the with alacrity, and it required the united Legislative Council Chamber on the second exertion of four policemen to put back the flat. To the right of this circular hall, oc- thirsty multitude, so as to clear the way cupying nearly the same relative position for Mr. Thurber, the donor of the fountain, as the old room, is situated a magnificent to reach it, and drink from it the first Assembly room 42x56 feet in area and 42 glass of water. Having done this a line feet ceiling, with galleries for ladies, press | was formed and glasses of ice water were and public, extending around three sides given out to those who desired without as before. The seats and Speakers's plat- regard to sex, age or condition of life, and form occupy the same relative position as in the old building. The reporters' gallery, evening, when the fountain was closed for on the east end of the room, is reached by | the day. private stairway from the smoking roo
