society and a hearty vote of thanks in appreciation of the trouble taken by Dr. Hattie in preparing the paper and journeying to St. John to present it before the society was passed.

DANGER IN DERELICTS.

Average of Nineteen a Month in North Atlantic

A Vessel Needed to Destroy them--International Legislation Suggested --- Four Collisions With Submerged Wrecks Reported Since Jan. 1.

Washington, Nov. 11-Derelicts, particularly along the trans-Atlantic routes, have Investigation proves that in the North Atlantic ocean derelicts alone average 19 a month, and with the constantly increasing size and speed of the great transacturation of their routes clear of floating dangers becomes more and more imperative. Thus reports Commander W. H. Southerland, in his account of the year's work of the hyrographic office of the navy.

While the navy department has a certain jurisdiction over these obstructions on our seaboard outside of the three-mile limit, it possesses no suitable vessel for a month, and with the constantly increas-

limit, it possesses no suitable vasel for the purpose of destroying them. Com-mander Southerland adds that it is to be regretted that no international legislation provides for the destruction of derelicted

on the broad ocean, especially as such legislation has been possible since 1889.

Since Jan. 1 four collisions with submerged derelicts or wreckage have been reported, and while their approximate locations are shown on the pilot chart, these indications merely serve as a general warning to the mariner, but are not accurate enough to insure his safety. As this matter is becoming of more importance each year, and as a great majority of the dere-licts in the North Atantic ocean origin-ate on this coast, Commander Southerate on this coast. Commends that a proper ly equipped vessel be provided to patro the trans-Atlantic lanes from this coast to the eastern limit of the Georges Bank to search for and destroy these dangers

to navigation.

During the past year the hydrographic office has issued a new edition of the American Practical Navigator, originally written by Nathaniel Bowditch, LL. D., in 1802, and the standard work on navigation and nautical astronomy in the United States navy and merchant marine. This book was extensively revised in 1880 but since that time seamanship has advanced with other sciences. Iron and stee have replaced wood in ship construction thus completely revolutionizing the action of the compass, while higher speed and modern appliances have necessitated changes in methods of navigation. This

by Lieut. George W. Logan, and the results were approved by a board appointed for the purpose of examination.

Diver's Wonderful Escape

Diver's Wonderful Escape.

Niagara Falls, Ont., Nov. 12—Joseph Taylor, a diver employed by Barry & McMoidie, contractors, who are building the crib work dam for the Toronto & Niagara Power Company, had a terrible experience yesterday. He went down outside the orib and was sucked into the gap into the crib by the water running through. He was under sixteen feet and subjected to great pressure from the current. Fellow divers strove for three hours before he was released. All their efforts failed, as they could not pull him loose from the crib until a block and tackle were rigged and forty men put on; but Doctor Kellam says he will recover. The escape is regarded as the most wonderful in the history of Niagara Falls.

The Halifax Board of Health is to tak every possible steps to prevent smallpox from coming into the city, and with this from coming into the city, and with this object in view a special meeting was held last evening, says the Chronicle, to consider the matter. The charman said that he had been informed by the health authorities of St. John of the outhreak in that city, and also of the prevalence of the decase in Cape Breton and the state of Maine Habitan is entirely free from of Maine. Halifax is entirely free from the discuss at the present time, and the board discussed at length the best means

the managers of the D. A. R., C. P. R., and I. C. R., asking them to have all their employes and their families vaccin-

The chairman, city medical officer and Mr. McFatridge were also appointed a committee to wait on Premier Murray and call his attention to the prevalence of the disease in other parts of the province, and ask his assistance and that of the provincial board to stamp out the disease.

WEDDINGS.

Last Wednesday evening in Ohurch of the Assumption, Carleton, Rev. J. J. O'Donovan united in marriage Miss Maggie Dineen, daughter of Mr. and Mrs. Jon Dineen, of Rodney street, and Ber. John J. Quilty, C. P. R. brakeman. The young couple are deservedly popular in the West End and their wedding was attended with many good wishes and congratulations. The bride was prettily attired in a dress of blue-grey ladies' cloth trimmed with white mains and Popular picture hat trimmed with black ostrich plumes and Maribou trimming with jet and steel ornaments. She carried a bouquet of white roses. Her bridesmaid, Miss Helena Donohoe, wore a grey tailor-The ceremony was witnessed by a number of friends of the happy principles, and in the evening they were heartily congratulated in their pretty home in Charlotte street. West End. Tangible expressions esteem in the form of handsome gifts were received by the bride groom's present was a pretty emerald and to the bridesmaid he gave a gold och with opal setting.

McGinn-Goodwin. Moneton, Nov. 10-Charles McGinn, formerly of Fredericton, was today married to Miss Alice Goodwin, formerly of Sherbrooke (Que.) The ceremony took place at Memramcook, Rev. Father Cormier, of St Joseph's College, officiating.

The bride is well and favorably known in Westmorland county, and as the nurse of Father Cornner during his illness of some time ago, made many friends here.

On the eve of his marriage, Mr. McGinn was presented at Moncton with a hand-some cabinet of silver and a very appre-

The old fashioned text book was a mer bill of fare to an impossible feast of reason. The modern laboratory offers som-

He starts with simple tests of his ability to judge distances, to pick out colors, to discriminate sounds. Thus trained in time, the reflex influences of mental strain on his bodily states and various

In the hope of making a start in this inviting field, Dr. Riley has succeeded in opening the new laboratory with \$150 worth of apparatus purchased from the laboratories of Columbia, Yale and Harvard universities. Half of this amount was generously contributed by an anonymous domor who wishes to be known as "An American student." Twenty-five dolance of smallpox on Sunday last, are bearing good results. No further cases have been reported Miss Mary Kelley, the patient, is as well as can be expected, and no fatal result is looked for. The work of disinfecting the Grand Union hotel is being proscuted with all dispatch. All those detained in the hotel are in good health.

Dr. Thos. E. Morris has decided that, if there should be any more smallpox cases, he will not act in them. Doctor lars was appropriated by the University

paratus consisting of pressure, pain and temperature points, Unconscious and min imal muscular movements are measured by the automatographer and the join

sense board.
Futher experiments in the kinaestheti and static senses by a graduated series of heavy and light test, weights and in the senses of taste and smell by various solu-tions lead to the wider field of experi-mental acoustics. Quinck's tubes and ordinary tuning forks furnish the simple means of determining the sensitiveness of the student's ear. For sensations of light and color and for usual perceptions of ingri-and color and for usual perceptions of space there have been provided several optical charts, a stereoscope and slides, a scripture pseudoscope, a set of Bradley's pseudoptics and a simple color wheel. For more varied and accurate results there are needed a multiple color wheel discs (costing \$20.) In the line of optics, however, it is possible that the laboratory assistant, Fred Jordan, of St. John, may make a reflection color mixer, a campi-meter, a fall chronometer, an accommoda tion board, a Hering's binocular tester and a stroboscope. The latter instruments made from materials at hand may be used simply for demonstration. For individual work instruments of precision are demanded. Among these are a telegraph key (\$20), a meteronome (\$3), a hand dynamometer (\$5), a stop watch (\$6), a Calton piston whistle (\$8), and an algometer (\$11.) Finally, if those connected with the laboratory expect to do research work it is essential to have an interrupter clock of some sont. The best is not the cheapest. A Hipp chromoscope costs \$70, but with its aid results may be obtained which may be worth publishing.

which may be worth publishing.
So far as the professor in charge is aware no systematic experiments have been carried on among university students in the maritime provinces such as are embodied in the publications of the Toronto psychological laboratory. Much less has there been any practical application in the public schools of the most recent pedagogical methods borrowed from experimental psychology, such as more extensions occurring to the open and motior types, the weeding out of defec-tive children, or even the determining of poor vision, tone deafness and the like. Although the U. N. B. students, owing to a lack of apparatus and materials to work with, may be unable to apply these

modern pedagogical priniciples in what-ever teaching they may do hereafter, it is yet hoped that the object of this new of an imaginary mind in an imaginary world, they are now offered practical this should lead to an appreciation of the fundamental properties of scientific work, In view of this it is hoped that the friends of the university will contribute aparatus, especially the Hipp chronoscope

WORD FROM HON, MR. BLAIR

What the I. C. R. Will Do at St. John-Hon. Mr. Fielding Hopes for Trade Development Through Maritime Province Ports.

H. E. Wardroper, the common clerk, Thursday received the following letter and enclosure from Hon. A. G. Blair:—

Ottawa, Nov. 9.

Dear Mr. Wardroper,—I enclose you a communication I have received from the acting minister, Mr. Frieding, in. reply to a former letter from me following up a previous conversation in which I begged that he might give me as assuring a statement as possible to remove any apprehensions which exist in St. John respecting the diversion of traffic which would, in natural course, go to St. John to the Allan steamers at Halifax.

I have the honor to remain

I have the honor to remain
Yours very truly,
ANDREW G. BLAIR. Herbert E. Wardroper, Esq., Common Clerk, St. John (N. B.)

My Dear Blair,—Referring to your recent letter, I can assure you that it will give me much pleasure to co-operate in any effort that may be made to use our terminal facilities at St. John for the shipment at that place of goods carried over the Intercolonial. The Allan steamship people communicated with the various railway lines asking their co-operation in carrying an increased amount of freight for shipment at Halifax. As the freight desired did not originate on our line, we were not in a position to control it. All that we could do was to give the parties concerned an assurance that the Intercolonial would co-operate in the effort that was being made, and this we are doing.

If the Allans or any other steamship line, or any other parties connected with the trade, will take similar steps with a view to increased shipments at St. John by the Intercolonial, you and your St. John friends can rest assured that we will meet them in the same spirit and give the movement our cordial assistance.

There is, I am glad to know, a growing feeling throughout the country that the poyts of the maritime province should be more largely utilized for the winter shipments of the products of the west. I feel that the Intercolonial should be ready to do its part and make all reasonable efforts to encourage this trade.

Yours faithfully,

W. S. FIELLDING.

Yours faithfully,
W. S. FIELDING.
Hon. A. G. Blair, Ottawa.

a bracelet at £100. He produced a note for £100; that happened to be all the money he had with him. It seemed all right to the shopman, but the good bishop, a stranger to the firm, was scrupulous. "Send it along to the bank and have it examined while, I wait," he said. "I should prefer it." Nothing simpler. An assistant was dispatched to the bank, and returned to say the note was one of the very best, and everything was very satisfactory. The bishop took the bracelet, the man behind the counter popped out to usher him into his carriage, when up strode an unmannerly variet of a up strode an unmannerly variet of a policeman in uniform, and tapped the

bishop on the shoulder.
"Hallo, Jim," he exclaimed familiarly The report was adopted.

The chairman called the new president to the chair, and Mr. Hayes thanked the association for the honor conferred on him.

The meeting was favored with three the poor bishop back again into the shop.

The meeting was favored with three conductions on the Provincial Sunday.

The proprietors said that there was a conductive statement of the shop that a sunday is the provincial sunday. The meeting was favored with three echo addresses on the Provincial Sunday School Association meeting held last month in Chatham. Rev. C. W. Hamilton spoke on the business part and Rev. A. H. Foster spoke on the teaching portion of the convention. He divided it under the following heads: 1st, Material for teaching; 2nd, Methods of teaching; 3rd, T. man who does the teaching. Rev. C. Burnett in an able manner spoke on the spiritual part of the convention, laying great stress on Bible knowledge.

The Least of His Troubles.

Senator Hawley, of Connecticut, was born in Stewartsville, North Carolina. A time ago he went down to see his birthplace and when he returned told his firiends about the trip.

"Why don't you buy the old place, Joe?" he was asked.

"What for?"

"What for?"

"Why converse leave if to posterity"

Fond Mother—"I wis jist tellin' oor Fanny that it's a real shame for 'er tae play th' piano on the Sunday." Aggrieved Neighbor—"But why did y' mention Sunday in partecular?"
