## QUESTIONS AND ANSWERS. Miscellaneous.

### A SOLICITOR NEEDED.

A very close relation of mine died some years ago very suddenly, leaving no will, nor any paper by which the amount of his property could be ascertained, yet I have reason to believe that he had money in the bank at the time of his death. What would be the best plan to follow in order to thoroughly investigate this matter? A SUBSCRIBER. Ontario.

Ans.—Employ a solicitor.

### FEED FOR BREEDING EWES—TIME TO CUT CLOVER.

1. What should be fed in addition to good pea straw to breeding ewes to have a good growth of wool and a healthy offspring?
2. Give a good recipe for condition powder for a mare in foal.
3. Mare sprains herself by turning too short on one leg in backing out of the stall, the leg swells, and she goes lame and stiff. Kindly give a remedy.
4. Which is the best milking class of cows, the Holstein or the Ayrshire?
5. When is the right time to cut clover and alfalfa, I mean in regard to blooming?

CONSTANT READER.

Ans.—1. Unthreshed pea straw, fed in moderation, makes excellent feed for breeding ewes. Good clover hay is the next best, and a feed of these alternately, one in the morning, the other in the evening, up to within a couple of weeks of lambing, when roots and a ration of oats and bran should be added.

2. Two ounces each of ferric sulphate, pulverized gentian, pulverized nuxvomica, and nitrate of soda. Mix, and give a teaspoonful night and morning in ground oats or bran.

3. It is impossible, from description, without examination, to diagnose the ailment as to location. Better consult a local veterinarian.

4. Opinions differ. There are good milkers and others not so good in both breeds. It is largely a question of individual performance. A good milker is a good one, no matter of what breed or grade.

### FEE FOR SURGICAL OPERATION.

A was taken sick and sent for doctor, who came and pronounced the disease to be appendicitis. Doctor tried to check disease, but failed, and recommended A to get second doctor to perform operation, as A was not able to be removed to hospital. Second doctor came, and, with the assistance of first doctor (who furnished everything necessary for operation), performed an operation, but said he could not find the appendix, and that possibly in time another operation might be necessary. In the course of time, A gets so he can walk around, but is a poor man, without trade or education, and no way of supporting his family excepting by heavy work, which there seems little prospects of him being able to do. Now, second doctor sends in a bill for \$125. A had nurse to pay, and first doctor, whose bill has not yet been received, so second doctor had nothing but his work to charge for. A has the testimony of several parties who have had like operations in Toronto General Hospital, which only cost them \$50.

1. Is there any limit to a doctor's charges?
2. Will A be compelled to pay the full amount charged?
3. Is a doctor in any degree responsible for the success of his work when he charges so highly?

Ans.—1. Yes; they must be reasonable. 2. A ought to write the surgeon, or have the physician see him. We think that upon his being made acquainted with A's circumstances, he will probably moderate his bill. If not, then A ought to tender him in cash such amount as, having regard to all the circumstances, would be a reasonable fee for the service performed.

3. It is a circumstance that may fairly be taken into account in the settlement, whether the matter be dealt with by the parties concerned, or by a court of law.

The fence that restrains the Wild Buffalo at Elk Island (Government) Park, near Ft. Saskatchewan, Alberta, is 'Lamb Fence'. Twenty miles of Lamb Fence around this park, which contains over Four Hundred Wild Buffaloes, the only large herd of Buffaloes in the world.

If Lamb Fence will hold a Wild Buffalo, it surely will hold the most vicious domestic animal.

Lamb Fence is a fence that will go over any hill or through any valley—a fence with a straight, hard steel upright and a knot that never slips—a fence with wires of even length—a fence made of high-grade steel wire—a fence that will continue to be its owner's pride.
