

"Just Work"

IHC tractors are built for "just work." Whether that work be plowing, preparing and planting a seed bed, harvesting, threshing, irrigating, ditching, hauling, road making, well drilling, or the many other things that a tractor will do, the steadiest worker is an

IHC Kerosene-Gasoline Tractor

Is overtime demanded—the IHC tractor never tires; is the load a heavy one—the IHC has plenty of reserve power; is the work dusty and dirty—the IHC has no exposed bearings or rapidly moving parts to be injured. It carries its own daily supply of fuel. It may be set close to a stack without reference to the direction of the wind, without danger of fire, and, with all these advantages, it has done, is doing, and will do more work in less time at lower cost, and will last longer than any other tractor you can buy. These are statements of fact, backed by records made in actual use both in contest fields and on real farms.

Investigate tractor farming. Learn how you can profitably use an IHC tractor. Get all the facts from the IHC local agent. He will point out the many IHC tractor features and advantages in design, materials, and construction. He will tell you about the complete IHC line, which includes gasoline and kerosene tractors, 12, 15, 20, 25, and 45-H. P. in several styles, and horizontal and vertical general purpose engines, stationary or mounted on skids or trucks, air-cooled or water-cooled, 1 to 50-H. P. See him or write the nearest branch house for catalogue.

IHC Service Bureau

The purpose of this Bureau is to furnish, free of charge to all, the best information obtainable on better farming. If you have any worthy questions concerning soils, crops, land drainage, irrigation, fertilizers, etc., make your inquiries specific and send them to IHC Service Bureau, Harvester Building, Chicago, U. S. A.

Are you anxious to save time and money on the work you are doing on your farm at present, and to get larger crops from your farm or orchard? If so, let us send you, **FREE OF CHARGE**, our pamphlets on the use of

Stumping Powders

USED FOR

**Removing Stumps and Boulders
Digging Wells and Ditches
Planting and Cultivating Orchards
Breaking Hard Pan, Shale or Clay Subsoils
Etc., etc., etc.**

Figure yourself what clearing your farm is costing now, or what you are losing in crops through not clearing. Write us about arranging demonstrations.

DE LAVAL CREAM SEPARATORS

Their Great Simplicity

DE LAVAL CREAM SEPARATORS EXCEL ALL OTHER separators not only in thoroughness of separation, sanitary cleanliness, ease of running and durability—but as well in their great simplicity.

Complete gearing of the De Laval Separator as it would appear if removed in a set from the frame of the machine. Note the remarkable simplicity of construction.

THERE IS NOTHING ABOUT THE operation, cleaning, adjustment or repair of a modern De Laval Cream Separator which requires expert knowledge or special tools.

NOR ARE THERE ANY PARTS which require frequent adjustment in order to maintain good running or to conform to varying conditions in the every-day use of a cream separator.

THERE IS NO NEED TO FIT and adjust parts to get them together right. They are so carefully and accurately made that they cannot help go together right. All bearings and bushings are easy to replace. There are no complicated springs, keys, ball bearings or other fittings, that only an expert can properly adjust.

IN FACT, SO SIMPLE IS THE CONSTRUCTION OF A De Laval machine that a person who has never touched a separator before can, if need be, take a modern De Laval machine completely apart within a few minutes and then put it together again as quickly. This is something which cannot be done outside a shop with any other separator.

THERE IS NOTHING ABOUT THE MACHINE THAT cannot be taken apart, removed or replaced by any one who can use a wrench or screw driver. In fact, the only tool which is needed in the use and operation of a De Laval Cream Separator is the combination wrench and screw driver illustrated below.

THE ONLY WAY TO PROPERLY UNDERSTAND and appreciate De Laval superiority to other separators, is to look over, and better still to try, a 1912 De Laval machine. Every De Laval agent is glad to afford prospective buyers the opportunity to see and try a De Laval Separator.

Combination Wrench, furnished with each De Laval machine, which is the only tool required in setting up, taking down or using the De Laval, the most simple cream separator ever built.

LIVINGSTON'S OIL CAKE MEAL

Is the most wholly nutritious stock food you can buy. Made of the purest Linseed—by the celebrated Old Patent Process (which makes it keep three or four years, if necessary)—proved by feeding tests, both practical and scientific, to be 95% digestible.

Even if LIVINGSTON'S OIL CAKE MEAL costs twice as much as the other foods which do not keep and cannot be half digested, it would pay every farmer and dairyman to get LIVINGSTON'S OIL CAKE MEAL. The cost is only a trifle higher.

LIVINGSTON'S OIL CAKE MEAL is really cheapest in the end—quickly increasing and improving the milk and healthily fattening cattle.
