CANADA'S NEXT CENSUS

The next census of Canada will be taken under date of June 1st, 1911, and will embrace the subjects of population, mortality, agriculture, manufactures, minerals, fisheries and dairy products. Population will be recorded under the heads of residence and personal description; citizenship, nationality and religion; profession, occupation and trade or means of living; wage-earnings and insurance; education and language spoken, and infirmities.

Every person living on 1st June will be entered on the schedule of population by name, as member of a family, institution or household, together with place of habitation, sex, relationship to head of the family or household, and whether single, married, widowed, divorced or legally separated. The month of birth, year of birth and age at last birthday will also be recorded. Entries will be made for each person to show the country or place of birth, year of immigration to Canada, if born elsewhere; year of naturalization, if formerly an alien, and also racial or tribal origin, nationality and religion. Every person of alien birth who has become a naturalized citizen is a Canadian by nationality; and every British subject who has acquired citizenship by birth or naturalization is also a Canadian by nationality. But there is no Canadian by racial or tribal origin, unless the Indians are so counted.

Every person having an occupation or trade will be entered for it, but if employed in the census year at some other occupation for part or whole time he will be so recorded also. If the person is working on own account, the entry will be so made. An entry is also required to be made showing where the person is employed, as on farm, in woollen mill, at foundry shop, in drug store, etc. Wage-earners are entered to show the number of weeks employed in 1910 at chief occupation or trade; at other than chief occupation if any; the hours of working time per week at chief occupation and other

occupation, if any; the total earnings in 1910 at chief occupation; the total earnings at other than chief occupation, and the rate per hour when employed by the hour.

Entries are required to be made for each person showing the amount of insurance held at date of the census upon life, as well as against accident or sickness, together with the cost of such insurance in the census year. Under the heading of education and language records will be taken for every person of five years of age and over showing the number of months at school in 1910, and if the person can read and write, and the language commonly spoken by each person. The cost of education in 1910 for persons over 16 years of age at college, convent or university is also called for.

The last question on the schedule of population relates to infirmities. It calls for a record of each person having an infirmity. If blind, deaf and dumb, crazy or lunatic, idiotic or silly, a record thereof will be made in the proper column, and the age at which the infirmity appeared is required to be specified.

CANADIAN FLOUR IN CHINA

Trade and Commerce Weekly Report, under date of July 11, had the following from J. B. Jackson, Canadian trade commissioner in China, on the possibilities of Canadian flour:

The imports of flour into Hong Kong from United States for March, 1910, was 34,285 barrels, and for the nine months ending March 31, 1910, 629,435 barrels. Southern China, for which Hong Kong is the distributing point, consumes a large amount of foreign flour. There are greater possibilities for Canadian flour exporters there than at Shanghai, or in northern or middle China.

The reason for this is obvious, because the Chinese flour mills are all situated either in Shanghai or north of this port. In addition to this the wheat growing districts in China are situated, to a
