Pathfinder Mining, Reduction and Invest-ment company, held today, John Rogers, a well known mining man, was elected president, vice Thomas L. Parkinson, re-Mr. Rogers is a caretul, conservative business man, and thorough niner, so the development of the com-Thus Far It Has Treated 81,000 Tons pany's properties will no doubt be pro-STRIKE ON MORRISON. A Rich Shoot of Copper-Gold Ore En-countered in the Tunnel Level. Greenwood B.C., Feb. 9 .- (Special.)-While enlarging the station in the tunnel level of the Morrison mine, preparatory to sinking a winze, the drills broke to sinking a winze, the drills broke through what was presumed to be the wall of a ven, and are now working in ens of ore per day. rich shoot of copper-gold ore. Addi-ional devlopment at this point will be

undertaken immediately and the new find exploited. The station is in a distance of 550 ject from the portal of the tunnel. The local management is urging the ne-cessity of the immeidate construction of an extension of the Deadwood spur to the mine. This will probably be taken General Superintendent Marpole of the Canadian Pacific, who is due here Tuesday. The Morrison is in a position to maintain a daly output of 100 tons wth proper shipping facilities. The ore

ABOUT THE MINES.

Again Shipping.

Greenwood, B. C., Feb. 11.-(Special.) A noteworthy strike showing the apparently illimitable area of the ore bodies of Deadwood camp was that made the end of last week in the Morrison mine. In a distance of 50 feet from the portal of the tunnel a station is being cut out, preparatory to the continuing of the sinking of a working in what was thought to be the true wall of the vein, but passed through the same and recent shots put in have disclosed a really fine shoot of gold-cop-Further exploration work in opening up the new find is in progress. The Morrison, if the Deadwood camp railway

tally discharged by the unfor-m. enterprises should start up and with him eting of the directors of the Mining, Reduction and Invest-Inv, held today, John Rogers,

smelter will be ready to follow suit early in March and is now receiving ore.

GRANBY SMELTER.

Grand Forks, Feb. 7.-(Special.)-From August 21 last, when it commenced optrations, until February 1, the Granby amelter treated \$1,000 tons of ore, which produced 2,700 tons of 50 per cent

first arrival from that district. He made the trip from Nome to Dawson by dog team. He says the mines of Nome are proving fairly satisfactory, but there are no new strikes. Prices for food are very high. He visited Kuskowin, Tanana and Big Salmon districts, in all of which the minera are done well, but symplice the miners are dong well, but supplies are short at Tanana and much suffering matte. The aboving is regarded as espe-cially good, because the second furnace did not "blow in" until October 13. The are short at Tanana and much supering is anticipated. Ames passed thirty out-fits on the trail, and says the men, hav-ing scanty provisions, must suffer greatly. Amos left Nome New Year's, with only hard tack for grub, getting other sup-plies at trading posts. present capacity of the plant, which will be doubled before May 15, is 600

defeated.

Boundary Creek License District.

A special meeting of the Board o License commissioners for the Boundary Greek License district was held in the Provincial Police office, Trail yesterday There were present Commiss ners E Jacobs, Greenwood (chairman); H. Cannon, Grand Forks, and W. B. Town send, Rossland, and Chief License In

Ottawa, Ont., February 11.-(Special.)licenses . submitted to the board, viz: The estimates for the Dominion for the mit camp. All the applications were granted, subject in two instances to com-pletion of buildings and provision of stabling accommodations, as required by the "Liquor License Act, 1900." In the case of Mr. Humball's application for a license for the hotel building lately erect-ed at Castlegar, Mr. Deacon, of Macneill

& Deacon, representing a number of res-idents of East and West Robson, opposed the granting of this license. He submitwinze from this level. The drills were ted that the petition in support of the application, which bore the signatures of residents of West Robson and Material Yard was not signed by the requisite number of "householders" the act calls for and presented a counter petition from 19 out of the 24 householders. An ac

ening up the new find is in progress. The Morrison, if the Deadwood camp railway spur, was extended to the mine, a dis-tance of half a mile, would easily be in a position to maintain a daily output of 100 tons. It is learned by the correspondent that the Standard Pyritic smelter has se-cured a contract for the treatment of the ore. There seems little doubt but that the Morrison is destined to become a large producer. Besides several known rich aboots, there is fully 50,000 tons of ore, running from \$7 to \$10 per ton available for shipment from this tunnel level. The tunnel is in a distance of 900 feet and has crosseut three distinct lodes.

crosscut three distinct lodes. The Humming Bird mine, situated in Brown's camp, has made its eighth ship-nent to the Granby smelter, amounting to a fraction over 61 tons. The average rafue of this last lot went .96 ounces p.d and .15 ounces silver. Work has rom the tunnel level, following the ore own with a face of two feet, with every ther, the workmen could now obtain inment to the Granby smelter, amounting to a fraction over 61 tons. The average tations have also been extended to the railing of this last lot went .96 ounces god and 15 ounces silver. Work has been started in sinking an incline winze and 'lacoma.
