one province, and the north two. RAMLWAY COMMISSION. Mr. Blair has at last mustered up courage to introduce a bill for the ap-pointment of a railway commission in Canada. He has been promising such a measure ever since he came into office, but, as he said himself, the more he studied the subject the more intricate it became. Personally he was almost ready to give up the problem in despair, but the pressure finally forced him to act. He says he has little hope that the measure will accomplish anything like what is expected of it, but he is willing to give it a chance. The com-mission, when it ultimately gets to work, will have in some respects pretty wide powers. It will consist of three gentlemen, holding office for a term of years, and removable only by a resolu-tion of parliament. They will have practically absolute power to fix rates within their sphere of action. But there seem to be important limitations. Even Mr. Blair is obviously uncertain as to whether it would be good policy to allow the commissioners to control rates on government railroads. Fur-thermore, the charter of the C. P. R. appears to prevent rates on that road from being regulated until it is earning 10 per cent. on its capital. These two facts taken together would seem to con-fine the action of the commission al-most entirely to the province of On-tario, but this may turn out to be a mission should become law this session. The government merely wish to have the full discussion of the subject, so that a proper measure may be prevared. Perhaps it will become law a year STEAMSHIP COMBINE. foint Arrangement Among Several At-lantic Liners.

lantic Liners. London, April 19.—The Daily Tele-graph announces this morning that pro-longed negotiations have resulted in a new combination among the steamship lines, involving no change of flags and little change in management. The kines involved are the White Star, the Do-minion, the Leyland, the Atlantic trans-portation, the American and the Red Star lines. The joint control of these amalgamated companies, says the Daily Telegraph will be practically in the hands of the same men who guide their separ-ate destinies, the intention to reduce working expenses, etc. The Times confirms the Daily Tele-graph's announcement of the forma-tion of shipping combination. The Times adds that Mr. Pirie, of Harland and Wolf, and J. P. Morgan, have been the principal agents of the affair, and notes that the Cunard and Allan lines main-tain their independent positions

EVERY WOMAN NEEDS IT. EVERY WOMAN NEEDS IT. There are times when every woman is tormented by itching skin and would give anything for relief. There is a pre-paration, known as Dr. Chase's Oint-ment, which is a prompt relief for these sufferings. Women prize it both for their own use and for its wonderful ef-fectiveness in curing Baby Eczema, scald head chafing, and the various skin dis-eases of childhood.

hence. THE METRIG SYSTEM. How many people in this country know anything about the metric sys-tem? It involves a complete change in weights and measures. It is in use over a large part of the world, but seen fit to adopt it. Sir Henri Joly. now lieutenant-governor of British columbia, is one of its warmest advo-cates. Even Mr. Jabel Robinson, member for West Elgin, hitherto re-garded as aggressively non-progressive, has expressed himself in favor of the adoption of the system. There are many other members of the agriculture committee who agree with him, and before long the system bids fair to be adopted for all public purposes. The seme movement is percepible in the system shall be used in drawing up specifications for all works on which he day is close at hand when Cana-dians will have to cease thinking in feet and yards and learn to think in mertes.
