Electricity as a curative agent is daily gaining more and more interest, importance and popularity, especially when administered by professional and experienced individuals who are fully conversant with the scientific application. It is wonderful what has been done for the cure of disease with electricity in the old country and in the states by specialists. But we need not go out of our own city to find the same progress in science.

In preference to the steam, by reading the electric can hardly fail being convinced by the testimonial given, that this potent agent in skilful hands does what all other known remedies have failed to accomplish. In view of these facts we are pleased to call attention to Prof. Veroy's advertisement in our paper, and we advise those interested to call and see him at once.

Patience will be repeated this afternoon, and the company will appear in the afternoon all next week. In the evening the Excelsior Novelty company will appear.

Women's Weakness. In preference to the steam, by reading the electric can hardly fail being convinced by the testimonial given, that this potent agent in skilful hands does what all other known remedies have failed to accomplish. In view of these facts we are pleased to call attention to Prof. Veroy's advertisement in our paper, and we advise those interested to call and see him at once.

The Zoo. The object to remove the zoo to the exhibition grounds was discussed at a meeting of the zoological society last night. It was reported that the zoological gardens at St. Louis were run in connection with the fair, and that the system worked well. The proposition is to have something of the same kind here, under the management of the society and the exhibition association. The matter will be further considered. In the meantime it will be well for citizens to think the project over and pass an opinion thereon.
