Cheap Paint? Here is the Answer!

No. 1
(From an actual photograph)
A measure of so called "cheap" paint at \$2.50 per gal., brushed out on wood, it covered 612 sq. feet.

No. 2
(From an actual photograph)
An equal measure of Lowe Brothers' "High Standard" paint at \$5.75 per gal., brushed out on wood, it covered 1,000 sq. feet.

USING an equal measure of each paint, and brushing them out on the same surface, we obtained the results pictured above. Observe that Lowe Brothers' "High Standard" Paint covered approximately 50% more surface, and covered it better than the so called "cheap" paint.

From this actual test it will be seen that it would take approximately 3 gallons of "Cheap" paint to do a job that would require only 2 gallons of Lowe Brothers' "High Standard" Paint.

Practically applied to a house it would work out this way:—

These houses are both of the same type, and each has a painting area of 2,000 square feet.

To paint this house (2,000 sq. ft.) with "cheap" paint Mr. A. required 6½ gals. at \$4.00 per gal. \$26.00
It takes a painter 1 day to apply 1 gal. of paint, therefore to apply 6½ gals. of "cheap" paint it took 6½ days at \$5.00 per day \$32.50
Total cost \$58.50

To paint this house (2,000 sq. ft.) with Lowe Brothers' High Standard Paint, Mr. B. required 4 gals. at \$5.75. \$23.00
A painter can usually apply in a day more Lowe Brothers' High Standard Paint than any other, but figuring on an equal basis of 1 gal. per day, it took 4 days at \$5.00 per day \$20.00
Total cost \$43.00

By using Lowe Brothers' High Standard Paint Mr. B. saved \$3.00 on the cost of paint and \$12.50 on the cost of labor—a total saving of \$15.50 on the complete job.

Never Figure the Cost of Paint by what it costs "per gallon." So-called "cheap" paint is the dearest you can buy measured by "job" cost, which is the only true measure of paint performance.

Before you paint consult us. We will be glad to show you how to paint most economically, and to give you color cards and other information for your guidance.
