

Miscellaneous.

— One cent per bushel makes a difference of \$10,000,000 in the value of the annual crop of corn in the United States.

— Charleston, S. C., according to a census just taken, has 52,569 inhabitants. Whites and colored about equally divided.

— It takes 8,500,000 yards of muslin annually, an eight cent of paper daily, to make paper collars for the American public.

— England is declining at the rate of eight per cent per annum in wheat growing, but she is increasing as a fruit producer every year.

— Thirty million dollars worth of grain, hops and apples are made into cider, beer and liquors in the United States, annually.

— England spends five times as much for charity as for education; while Switzerland spends five times as much for education as for charity.

— R. Whitaker's cotton mill, one of the largest in Oldham, England, containing fifty thousand spindles, has been burned. Loss a million dollars. Many are thrown out of employment.

— The color of all green tea, as it is called, is artificial, and there is little doubt that a poisonous property is imparted to the herb by the coloring process. Chianmen never drink "green" tea.

— It is a very simple but curious fact that a single inch of water converted into steam, under the ordinary pressure of the atmosphere expands into 1690 cubic inches, or nearly one cubic foot.

— Edward J. Ford, a colored man who has been for over twenty-six years under a sentence of death which no Governor of Pennsylvania was ever willing to enforce, has just been pardoned and released from the Philadelphia County Prison.

— The Pacific ocean covers 80,000, 000 of square miles; the Atlantic 25, 000,000; the Indian ocean, 14,000,000; the Southern ocean to thirty degrees is 25,000,000; the Northern ocean, 5,000, 000; the Mediterranean Sea, 1,000,000; the Black Sea, 170,000; the Baltic, 175, 000, and the North Sea, 160,000.

— In the cemetery of Pere la Chaise, in Paris, there is a grave from which rises a woman's arm, beautifully chiseled in marble. The hand is clasped by another, evidently a man's, that comes from an adjoining grave. It was the fancy of a young husband who did not long survive his bride.

— Neal Dow was called into the Portland police station recently, to confront a tipsy boot agent who insisted that they drank brandy and water together in a sound boat. When the late apostle of temperance got there, the fellow explained that he drank the brandy and Dow the water.

— A few days ago a customer in a wholesale house in this city remarked to the dealer that he noticed an unpleasant odor upon the premises. The latter not perceiving anything, and the customer added:—"Well, I guess it is the seller who smells." The other replied:—"Not at all, my dear friend. It seems to be the buyer who smells."

— LIQUOR SEIZURE AT YARMOUTH.—A telegram to the "Chronicle" says a quantity of liquor, say \$100 or \$200 worth, seized by the Clerk of License under the destruction clause of the law, was publicly destroyed on Thursday in accordance with the provisions of the same Act.

— A flash of lightning on Sunday damaged the house of Mr. Charles Lamb, in Hubbardston, Mass., to the amount of \$50, discharged a loaded gun in one of the rooms, knocked a bureau against the room, tore off the pendulum of the clock, and moved the hands on the dial, yet did no harm to the family, nor set the house on fire.

— The U. S. steamer "Huron," with 134 souls, went ashore on the North Carolina coast on Saturday morning the 24th ult., and became a total loss. About one hundred lives were lost. The cause of the wreck is attributed to local attraction of the compass, and the strong current setting in shore, which made the vessel go further southward than her course indicated.

— A Washington dispatch says Montez Cays, the Guano Islands near Jamaica, will probably become a subject of diplomacy between England and the United States, the latter having recognized the rights of discovery of the islands, and the former laying claim to it. The claimants before the United States and Spanish Commission complain to the Secretary of the State of the omission of the Commission, which for a year has transacted no business.

— Col. King's farm on the Rio Grande consists of 160,000 acres, all fenced. He has been growing in wealth since the war with Mexico, and now owns, besides the land, 22,000 horses, 30,000 cows, 75,000 sheep, and 30,000 mules. He employs 300 Mexicans as herders. Most of the land has been fenced at an enormous cost. He despises "book learning," but has become well educated in the ways of the world. He lives extravagantly, and is literally "a monarch of all he surveys."

— Once upon a time the British Crown sent its faithful subjects in the colony of South Carolina a chime of bells, which were hung in the steeple of St. Michael's. That graceful spirit which a pupil of Sir Christopher Wren designed, and which is to-day the rest as well as the first thing which one sees after entering Charleston harbor. These bells were captured by the British during the Revolutionary War, and were sent to England, where they have remained to this day. Although St. Michael's has chimes of its own, an English merchant has offered to send back the old bells, and Senator Gordon has introduced in the Senate a resolution providing for their admission to the United States.

Good Schummer's Work.

— The schooner "W. & H. Wetherspoon," of Parrabero, G. E. Pettis master, has delivered her last cargo of freight for the season. This vessel has made a capital summer's work between this port and New York. She made her first clearance from Windsor on April 4th, and during the season has landed nine cargoes of plaster, of about 340 tons each, at New York, and brought back to Windsor and other ports the same number of full cargoes of freight.— Windsor Mail.

— The last sensational suicide in Europe is that of Marie Prieur, a pretty French singer of twenty-five, who ran away from her home at Toulouse with Count Huzon Lamberg, an Austrian cavalry officer. She had acquired a competency and retired from the stage young as she was; then she was smitten with a passion that the Count failed to reciprocate fully, and when he left she placed his portrait over her heart and with a revolver bullet pierced it.

— ORIGIN OF "HEBRAH."—The word is pure Slavonic, and is heard from the coast of Dalmatia to Behring's Straits, when any of the population living within these limits are called on to give proof of valor and courage. The origin of the word belongs to the primitive idea that every man that dies heroically for his country goes straight to Heaven—Elysium (to Paradise)—and in the shock and ardor of battle the combatants utter the cry, as the Turks do that of "Allah!" each animating himself by the servitude of immediate recompense to forget earth, and to condemn death.

— A Jersey mechanic has invented a new explosive machine for which he claims a priority of invention, and which is capable of being employed either on land or sea. Desiring of giving the Turks the benefit of his invention he has, for that purpose, been in communication with the Turkish Embassy in London, submitting details of the machine. He has received a very favorable reply, acknowledging the value of his invention, but with an intimation that his offer could not be accepted before the matter had been brought before her Majesty's Government, which he is led to understand will be done.

— RELIEF SOCIETY OPERATIONS.— More relief has been given out at the headquarters, King's Square, in the park, than was distributed in the middle of July. This has been caused by the near approach of the cold season. The daily number of applications for blankets and winter clothing varies from 150 to 200, although on a few days it exceeded the latter number. Provisions are given out for about 40 persons each day, and the rations are supplied in sufficient quantities to last for 15 to 20 days. At present there are about 80 families on Queen's Square and some 200 families on the Barrack Square.— St. John Telegraph.

— The Charlottesville (Va.) "Chronicle" says:—"A farmer living near Charlottesville informs us of the curious operations of those industrious little insects, the ants, in one of his fields. A few weeks ago he sowed timothy seed on the field with his wheat. The wheat has come up nicely, but examination shows that the grass seed has been carefully gathered by the ants and deposited in piles at the entrance to their subterranean abodes, with a view to a plentiful supply of food during the winter. All over the field are these little mounds of timothy seed, and a great deal of it has been carried across the public road and deposited in an adjoining field."

— SAME AS WHITE MAN.— We have another evidence of the imitative genius of the Chinese. A Chinaman by the very common name of Chung, who worked on the farm near the mission, in Los Angeles county, Cal., earned wages that amounted to \$151. His employer gave him a check intended to cover that sum, but in writing it out he wrote the figures \$131. Afterwards he changed the check so as to read properly, and wrote on the back of it saying that it had been raised to \$151. Chung began where his employer left off, and raised the figures to \$951. Then he presented the check at the bank, drew the money, and speedily departed for a locality unannounced and unknown, as any white man would have done.

— Two singular incidents, which will furnish news to crack to believers in the supernatural, have recently come to light in England in regard to the recent loss of the "Avalanche" in the British Channel. A lad, who was a great friend of one of the apprentices who was lost, made arrangements to accompany him down the Channel and come ashore with the pilot, but at the last moment before sailing he was seized with an undefinable and unaccountable tingling that he declined to go, and thus escaped almost certain death. The apprentice who was lost had a retriever dog who was very fond of him and which answered to a shrill dog whistle that he carried. On the night of the shipwreck his mother and aunt were in the sitting-room and the dog in the kitchen. Between 9 and 10 o'clock the ladies were startled by hearing a shrill whistle used by the young man. The dog heard it also, gave the usual recognizing bark, and bounded up stairs where he thought his master was. The whistle was heard just about the time the "Avalanche" went down, and it was by two credible witnesses, whose testimony was confirmed by the response made to it by the dog of the lost sailor.

— OBITUARY.— The sad intelligence of the death of Mr. E. Welch, of Bear River, reached here on Tuesday evening last, where feelings of the most profound regret were expressed by the large number of business men with whom his associations had linked him, as well as his many personal friends and acquaintances. A few weeks ago the deceased took a severe cold, which settled in his head; and though his sickness was not of an alarming nature at first, it finally terminated in brain fever, resulting in his lamentable death. As an esteemed, reliable and enterprising citizen, Mr. Welch stood foremost in the rank, and he was an extensive mill-owner will be sadly missed by the many laboring men to whom he has given employment.— Daily Courier.

Telegraphic News.

**CANADA.**  
— TORONTO, Nov. 30.—Full accounts of the execution of John Williams—to-day, are published. When informed that he must die he exclaimed, "My God, all I hope for is to go to the gallows." He had a reprieve, and showed by his demeanor that he was trying to fix his thoughts on something higher and greater than life in this world. His daughters, four in number, visited the gallows on Tuesday for the purpose of wishing their unhappy father a last farewell. The interview, lasting nearly two hours, was most affecting. The women, clinging to the unfortunate man, displaying most poignant grief, and uttering lamentations painful to hear. The prisoner, though much affected, and nearly breaking down, managed to sustain himself with the remarkable fortitude that has marked his life since his condemnation. Amid his tears, which fell freely, he counseled them to lead good and virtuous lives, and if they did not meet with reward in this world they would surely be acceptable in the eyes of their maker. Last night the Rev. Mr. Johnson stayed in the prisoner's cell and engaged in religious conversation. At midnight the prisoner wrote a letter addressed "To my children and friends," in which he regretted that he had not led a more religious life, and tendered his children loving advice for their guidance through life. He also expressed his confidence in the mercy of their Heavenly Father, and wished the unhappy night when he committed the murder. He marched into the yard with a firm step, but apparently suffering intense nervous excitement. When the party had ascended the platform he addressed the assembly as follows:—"Gentlemen, I wish to make a few remarks regarding this sad event. I desire to thank the Governor, and I thank all those who have used me for the kind way they have used me. I wish to thank you, my friends, for the way they have treated me. I am glad that I got a fair trial. I think the public at large for what they done for me also my friends. That's all."

— These sentences were uttered at intervals of nearly a minute each and with great emotion. The executioner conducted him to the trap, and having pincioned his legs, drew the black cap over his face and adjusted the rope. Mr. Johnson read a portion of the Church of England service and began to repeat the Lord's prayer. A special officer, mounted on a horse, held a signal, whereupon the hangman sprung the trap and the unfortunate man struggled in vain to extricate himself. The drop was five feet and his body twirled convulsively, but at the expiration of seven minutes all was over. After the body hung for the usual twenty minutes, it was cut down. The body of the nose being under his left ear it had slipped around to the back of his neck and death resulted from strangulation. The body will be buried in the gallows yard immediately beneath the spot where the scaffold stood. The executioner was Henry England, a whiskey detective. He applied for the platform in ordinary costume and, without any disguise, performed the duty in a nonchalant manner.

**EUROPE.**  
— PARIS, Nov. 30.—According to intelligence from an authentic source, negotiations for the arrangements of the crisis are temporarily at a stand still. President MacMahon and all information which he receives from the Emperor, but when an attempt was made to draw him in it was discovered he could not sit upright. A special issue of the "Allgemeine Zeitung" reports the Pope as dying. Rome, Dec. 1.—A despatch says since the 22nd the Pope's legs have swollen to an unusual degree, and the discharge is so copious as to cause uneasiness. Yesterday he received the officers of the Papal guard and chatted and joked with great vivacity. It is well believed certain that a confessor will meet in the Pontifical bedroom, and this fact has given rise to considerable speculation on all sides. It is looked upon as significant and as betokening the beginning of the end. The Geshoff's are allowed to live at Kadice, near Constantinople, under police surveillance. There is a great panic in Sofia, and the inhabitants are fleeing. It is feared the Russians may cut the road between Sofia and Tartar-Madjidji. Mehmet Ali has notified the War Office that he cannot attempt to relieve Plevna unless strongly reinforced. Great efforts are being made to reinforce him. Chevket Pasha is under arrest, and will be court-martialed for not attempting to take Plevna. The Russians are raising works against Erzerum and building barracks for the troops. Great excitement prevails in Stamboul on account of the calling out of reserves, and disturbances are expected. All servants of the palace have been armed. There are great differences of opinion among the ministers as to the expediency of making proposals for peace, but at present the war party prevails at a favorable opportunity. The situation is very critical. London, Nov. 30.—The Turks have seized two Italian vessels in the Bosphorus, as, although they had passed the block in the Black Sea. Count Corti formally declared that if they are not released he will

proclaim the blockade ineffectual and invite Italian ships to send their vessels to the port.

— The blockade ineffectual and invite Italian ships to send their vessels to the port. The blockade ineffectual, Italy will resort to extreme measures. Unless the Porte yields there will be a rupture with Italy. It is probable that the vessels will be declared lawful prizes.

**UNITED STATES.**  
— NEW YORK, Dec. 1.—An American in the city of Mexico says, on account of the hostilities anticipated we are watched and are under bonds not to leave until matters are properly adjusted and resume their wonted course. Troops are constantly parading the streets. They surround the city and watch foreigners as if war was actually declared.

**WOLFFVILLE.**  
— WOLFFVILLE, Dec. 3.—The main college building, including the president's residence, college library, and museum, were destroyed by fire on Sunday evening at six o'clock. The books in the library were mostly saved in a damaged condition. The museum, however, is a total loss. The cost of the building, \$20,000; insurance about \$10,000. The ladies' seminary and new boarding-house saved.

— The Liverpool and London and Globe office has \$4,500 on the building, and the Queen \$5,000 on the library and furniture.

**THE GREAT SHOSHONEES REMEDY AND PILLS.**  
— The success that these medicines have met with since their introduction to the public some years ago, proves plainly to the most skeptical that they are medicines that perform what they are advertised to. The virtues of these medicines have been well testified to by those who have tried them in a satisfactory manner. For diseases of the Blood, Liver, Lungs, &c., they are unsurpassed. We have testimonies of miraculous cures of these diseases, and of many others. If any one is afflicted with a box of the Remedy and a lot of Pills. No injurious effects will follow their use to the most delicate person. They are purely vegetable; there being no mineral matter in them. The cost is small, while the advantages derived from their use will doubly repay you for your expense and trouble. The medicines are widely known throughout the Dominion, and are for sale by the principal medicine dealers. Try them, and be convinced that these medicines are no humbug. No one who has tried the Shoshonees Pills has ever pronounced an unfavorable opinion of them; no family where they have been used will be without them. Full information may be had on all particulars touching the use and the experience of those who have used them, by securing the Treatise or the Circular, sent free by mail, in the Dominion. Price of the Remedy in pint bottles, \$1; Pills 25 cents a box. For sale by W. W. CURRIE, Bridgetown, N. S.

**CONSTITUTIONAL CATARRH REMEDY**, the only certain, safe and effectual cure for Catarrh, builds up the system and cures all other diseases at the same time. Asthma, Hoarseness, Catarrh of the Throat, Gonorrhoea, Diseases of the Kidneys, Nervous Debility, their leave when the Constitutional Catarrh Remedy is used as directed. Price one dollar per bottle. For sale by all Druggists and Medical Dealers.
