

Recommendations for action	26
Potential impacts of climate change on human settlement, the energy, transport and industrial sectors, human health and air quality	27
Major findings	27
Principal issues	27
Human settlement	28
Energy	29
Transport	30
Industry	30
Human health	31
Air pollution	32
Ultraviolet-B radiation	32
Recommendations for action	32
Potential impacts of climate change on the world ocean and coastal zones ..	33
Major findings	33
Impacts of sea-level rise on coastal zones	34
Threatened populations in low-lying areas and island nations ...	34
Alteration of the biophysical properties of estuaries and wetlands	35
Inundation and recession of barrier islands, coral atolls and other shorelines	36
Impacts on the World Ocean	37
Recommendations for action	38
Impacts of climate change on seasonal snow cover, ice and permafrost, and socioeconomic consequences	38
Major findings	39
Principal issues	40
Seasonal snow cover	40
Ice sheets and glaciers	41
Permafrost	42
Recommendations for action	44
Summary of major future actions	45
Concluding remarks	46
