

reports of the technical advisers and data obtained at the hearings:

(1) Provide for adoption by the two governments of specific objectives for boundary waters quality control as the criteria to carry out that portion of the Boundary Waters Treaty of 1909 wherein the two countries "agreed that the waters herein defined as boundary waters and waters flowing across the boundary shall not be polluted on either side to the injury of health or property on the other." (36 Stat. 2448)

(2) Provide for implementation, by those responsible for pollution, of the measures necessary to obtain or maintain the specific water quality objectives. This program which would necessarily require many years for completion would cost approximately \$125 million.

(3) Provide for continuing supervision of boundary waters quality control by the Commission through international "boards of control" and through the appropriate authorities in each country charged with enforcement of pollution control laws or regulations.
