to the coarfest as but feldom all quantity at r in the Amerance equal to uantitiea from nens of Ghent, g and durable, d as the Irish; fuch a manuftomed to the for their wearcheap as any not be supplied sh England as expences here. d drilling. Of o England from made of flax.

es. Ruffia had hen charged with r as British failce (of 36 yards) ther expenses. † The

linen manfasture, in England, that from 351. to 401. This The law that obliged American P. ips to have the first set of fails of British can as being at an end, the Russiaduck only will be used. It is said the British sail-cloth is more apt to mildew, but that may be prevented in great measure by pickling when new. It is also said, that the Russia sail-cloth is more pliable. France makes sail-cloth, but it is much dearer and inserior. Some has been made at Philadelphia, but the quantity must be trisling for some time.

PAPER and STATIONARY.

Writing-paper is chesper in France and in Flanders than in Great Britain or Holland; but there is very little to be met with in either of the former countries of a good quality. Good paper may be got from Holland. She can underfel England; but a confiderable quantity of paper and stationary will continue to be first from the latter. Coarse paper for newspapers, &c., is made in America.

L A C E. S.

The importation of the better quality of Flanders or Brussellace, at it is called, cannot, for a long time to come, amount to any thing considerable. The most ordinary and low priced thread lace, and the black silk lace for trimmings, are more immediately in demand in the American States. The thread laces are best in Flanders and Britain. Although black silk laces may be had on the best terms at Barcelona and Marseilles, considerable quantities of the British manusacture has been imported into America.

Callicoes and printed Goods.

Next to woollens, linens and cutlery, this is one of the most considerable articles imported into the American States, and as there are now large manufactories established in the Netherlands, in France, in Switzerland, and in many other parts of Europe: The price at which those goods can be afforded in the several countries, and the credit that may be obtained, will determine the Americans in their purchases. England, it is thought, will have the advantage greatly in this branch, especially in the finest and most beautiful patterns. Switzerland manufactures these articles as cheap, if not cheaper than any country, but her situation is not advantageous for export to America. France, during the war,

This has occasioned a great demand for British sail-cloth, which has a bounty of 2d per yard on exportation. The duty on Russa duck when shipped, is about 2s per piece of 36 yards. It is considerably wider than English.
