My Lever Hoop Cutter

Is an Iron Machine on timbers, capable of cutting from 75
to 100 hoops a minute. Makes the tap while cutting. I also
make Pointer, for pointing planks before they are cut.
Planer for finishing hoops, and Coiler for coiling, all simple
and substantial. Mill owners whose supply of merchantable
timber is becoming scarce, will find this set of Machinery a
great addition to their business, as it works that useless stuff,
Swamp Elm, into an article, the demand for which is almost
unlimited. A BARREL HOOP. Write for particulars.
