present cheap. European vices are not so common as they will be in a short time ; and the expenses of the Mission need not be large. Only let the Society determine to establish it at once in all its fulness, and a grant of 500l. a-year would be of greater service now, than 1,000l. in ten years time.

Hoping that these few remarks may be the means of calling or recalling the attention of your readers and of the *Society for the Propagation of the Gospel* to this too long neglected field of labour,

I remain, yours faithfully,

BRITIUS.
