John Gander.

The death is reported from Boscombe, Hants, Eng., of John W. Gander, for 30 years a resident of Toronto. He came to Toronto from England in 1871, and in course of time became president of the Builders' Ex-change, chairman of the Technical School Board, and president of St. George's Society. His health failed a year ago, and he returned to England.

According to Whittaker there are something under a million of miners actually at work, which means probactually at work, which means probably that the whole race numbers over two millions. coal. And this is odd, for the majority of householders are certainly not monsters of selfish and miserly indifference to the human factor in economics.

Even artists have remained unstirred by the provocative mystery of this subterranean race, which perspires with a pick, not only beneath our cellars, but far beneath the caves of the sea itself. A working miner, Joseph Skipsey, had to write the one verse about this race which has had vigor enough to struggle into the anthological structure. about this race which has had vigor enough to struggle into the anthologies. The only novel handling in the grand manner of this tremendous and bizarre theme is Emile Zola's "Germinal." And, tho it is a fine novel, tho it is honest and really impressive, there are shallows in the mighty stream of its narrative, and its climax is marred by a false sentimentality, which is red by a false sentimentality, which is none the less sentimentality for being

And then you feel that you yourself are the exotic stranger in those regions. But the procession absolutely ignores you. You might not exist. It goes on, absorbed, ruthless and sinister. Your feeling is that if you got in its path it would tramp right over you. And

feeling is that if you got in its path it would tramp right over you. And it passes out of sight.

Of the mining villages little is known. And herein is probably a reason why the mysterious people remain so mysterious. They live physically separated. A large proportion of them never mingle with the general mass. They are not sufficiently seen of surface men to maintain curiosity concerning them. THACKERAY AND THE CRITIC. G. K. Chesterson's Interesting Analysis of "Vanity Fair."

Of "Vanity Fair," Mr. Chesterton says that Thackeray's point surely is that Amelia was a fool; but that there is a certain element in virtue, by which evea fool manages to outlast a knave. When are not sufficiently seen of surface mento maintain curiosity concerning them. Only at elections do they seem to impinge in powerful silence on the destinies of the nation.

I have visited some of these villages. I have walked over the moors to them with local preachers, and heard them challenge God. I have talked to doctors and magistrates about them, and acquired the certainty, vague and yet vivid, that in religion, love, work and debauch they are equally violent and splendid. It needs no insight to perceive that they live nearer even than sailors to that central tract of emotion where life are at the end, Amelia and Becky meet at the end, Am
