

HAZELTON MINES. •

Hazelton is assuming all the earmarks of a very prosperous mining camp, only awaiting the completion of the G. T. P. to become a big shipper of profitable ore. For some years a number of the best claims have been doing development work and getting out ore. The results have been more than gratifying and some of the properties have proved to be very rich mines. Their development means the building of a big camp and a smelter on the coast. Mention is here made of some of the principal ones, stating the amount of development done.

THE SILVER STANDARD is owned by a group of capitalists connected with the contractors constructing the G. T. P. It is located on Glen Mountain, about six miles from the railway at New Hazelton. Four tunnels have been driven from 500 to 600 feet each. One shaft is down 200 feet and three others have a total depth of 300 feet. There are twelve good veins on the property. There are 400 tons of high grade silver, lead and copper now on the dump. This ore is valued at \$80,000.

HARRIS MINES. These are located on Nine Mile Mountain, about six miles from New Hazelton. It has four veins all stripped and opened by cuts for 300 feet. There are three shafts, one tunnel of 250 feet, and several drifts of different lengths. The ore is a high grade silver-lead and a carload of it is at New Hazelton awaiting the arrival of the rails. There are 150 tons of ore on the dump valued at \$100 a ton.

ROCHER DE BOULE COPPER MINING CO. have a mine located on Rocher de Boule Mountain, near New Hazelton. A tram line which they will install in the spring will put it within three miles of the railway. The company have driven four tunnels of 220 feet, 60 feet, 400 feet and 34 feet, besides two shafts and several hundred feet of surface stripping
