bler and Cariboo Consolidated company, has returned from Spokane, where a meeting of the directors was held. He brings with him the estimates for the compressor plant, which the company proposes to install at the mine. There will be a 50-horse power tubular boiler, and a four-drill compressor plant, with all the latest improvements and fittings complete. The weight of the entire plant will probably exceed 18,000 pounds. Furtunately there is a wagon road most of the way, and transportation will becomparatively cheap during the winter. The work at the mine will be still more vigorously prosecuted. A winze will be sunk on the ore chute, which is fully three and a half feet wide for about fifty feet. Wealth would seem to be in store for the fortunate owners.

Another conditional offer was also made to place a considerable block of the stock at 45 cents. Neither offer was accepted by the holders.

TO INVESTORS. Write us if you desire to invest in Rossland, the greatest gold camp in the world. We are on the spot and will fill your orders or invest your money to the best advantage. We handle mines, stocks and real estate and are agents for Rossland townsite and the railway addition to Rossland.

We have invested many thousands of dollars for our clients. We are the recognized financial agents and investment brokers. Write any bank or commercial firm in Rossland for our rating and standing. We are the pioneer investment brokers of Rossland and our experience is at the service of our clients. We have no property of our own to sell nor no mining schemes to promote. We do a legitimate brokerage business for our clients and make them money. Our commission gives us sufficient profit. You have no commission to pay. The seller pays us.

WRITE US if you doubt the wisdom of investing in Rossland securities. State plainly what particular information you want and we will gladly answer you queries. Many people think that to invest in mines is to gamble. This is a fallacy. Mines and mining stocks are a legitimate investment if the same care and judgement be used as in other financial transactions. If you have no practical experience we have. Mining is our business. Our experience we place at your disposal and we request that you will open up correspendence with us.

Description of the Property.

The company owns the Annie Fraction and the Comet No. 2 mineral claims. The Annie Fraction is situated between the California, San Francisco and Black Bear, the latter of which is the property of the great Le Roi Mining & Smelting company and is the first western extension of the Le Roi mine. The vein of the Le Roi can be traced through the Annie Fraction and men at work on this property have tapped an ore chute at a depth of 40 feet from which assays gave returns of from \$14 to \$20.

The Comet No. 2 is a full claim, 1500 feet square, and lies about three miles north of Rossland. It has two strong well-defined ledges running through it. A prospecting shaft now down to feet shows, nothing but vein matter the whole mass being well diffused with copper and iron pyrites. Assays averaging \$6 to \$8 have been obtained from this showing.

Shares.

The entire capital stock of the company excepting treasury shares has been pooled. The company now offers 50,000 shares of treasury stock at the low price of

Twelve and One-Half Cents a Share.

The proceeds will be used in purchasing machinery for the Annie Fraction.
