

BEAVER FLOUR

MAKES BETTER BAKINGS

THE reason why BEAVER FLOUR makes such light, flaky pastry, and such excellent bread, is—it is a blended flour.

BEAVER FLOUR is a combination of the world-famed Ontario Winter Wheat scientifically blended with enough Western Hard Wheat to give it strength—the resulting product is flour unsurpassed for high quality and richness of flavor.

Try BEAVER FLOUR and note the marked improvement in your bakings.

Relieve Your Rheumatism For 25c.

NR does it by improving digestion, assimilation and elimination—the logical way.

NR Today—Relief or No Pay

There are three vital processes of human existence—the digestion of food, the extraction of nourishment from it and the elimination of the waste.

Let anything interfere with these processes—let them be interrupted or improperly carried on, and sickness of some kind follows.

Poor digestion and assimilation means failure to derive full nourishment from food and that in turn often means impoverished blood, weakness, anemia, etc. Poor elimination means an accumulation of waste matter which poisons the body, lowers vitality, decreases the power of resistance to disease and leads to the development of many serious ailments.

Rheumatism, due to some interference with the process of elimination, failure to get rid of certain body poisons, cannot be expected to yield to any medicine that fails to correct the condition responsible for it. Could any reasonable person expect to rid himself of rheumatic pain as long as

rheumatic poison is allowed to remain in the body. Think of this. It explains the success of Nature's Remedy (NR Tablets) in so many cases where other medicines have failed. Thousands are using NR Tablets every day and getting relief. Why pay five or ten times as much for uncertain things? A 25c box of Nature's Remedy (NR Tablets), containing enough to last twenty-five days—must help you, must give you prompt relief and satisfactory benefit or cost you nothing.

And Nature's Remedy is not only for the relief of rheumatism. It improves digestion, tones the liver, regulates kidney and bowel action, improves the blood and cleanses the whole system. You'll feel like a new person when you've taken NR Tablets a week. You've tried the expensive medicines and doctors, now make the real test. You'll get results this time. Nature's Remedy (NR Tablets) is sold, guaranteed and recommended by your druggist.

Why are WRIGLEY'S

flavors like the pyramids of Egypt? Because they are long-lasting.

And WRIGLEY'S is a beneficial as well as long-lasting treat.

It helps appetite and digestion, keeps teeth clean and breath sweet, allays thirst.

CHEW IT AFTER EVERY MEAL.

Sealed Tight—Kept Right

Extracts Can Be Sold Only By Small Bottle

Limit of Two and a Half Ounces per Day per Person—Record of Sales Must be Kept

In pursuance of the announcement made by Premier Foster to a delegation of wholesale grocers that the provincial Government would make regulations governing the sale of extracts, essences and tinctures, the Royal Gazette contains notice of the rules and regulations.

These are made under The Intoxicating Liquor Act 1910 and reduce the quantity of extract which may be retailed in any one container to two and one half ounces and provides severe penalties for infraction of any of the rules and regulations. This action is taken on account of the use of extracts for beverage purposes and the recent prosecution of wholesalers at St. John under the Prohibition Act for having extracts for sale.

It is provided that every manufacturer, wholesale merchant or broker before he shall manufacture, compound, purchase, receive, keep for sale or sell any tincture, essence or extract of ginger, lemon, vanilla or any other flavoring extract containing alcohol, must first notify the Chief Inspector by registered letter at Fredericton of his intention.

No extracts, essences or tinctures shall be sold except in containers or bottles containing not more than two and one half ounces and all persons selling such must keep a record showing names and addresses of all persons buying, the dates of sales and the quantities of all sales. A true copy of such record must be furnished any Inspector upon demand and the book must be open to inspection by any Inspector.

The regulations however, will not prevent the sale of such extracts in a bottle or container containing more than two and one half ounces, to a druggist or manufacturer of confectionery or similar commodity or to a person in any trade or business in which any such article is commonly used for legitimate purposes, or to any public institution or to dealers for resale to any of the persons mentioned in the proviso. Record books for such sales must be kept and every person so selling shall have reasonable ground to believe that such sale is for legitimate purposes.

Preparations containing less than two per cent of proof spirits do not come under the provisions of the rules and regulations.

No peddler or transient trader is permitted to sell or dispose of any tincture essence or extract mentioned, no sale for beverage purposes is authorized, no retailer shall sell to any person in one day more than two and one half ounces except as provided.

Any person, firm or corporation, his or its clerk, servant or agent selling for beverage purposes shall be liable under The Intoxicating Liquor Act, 1910. Penalty for a first offence is ten dollars fine, for second offence a fine from twenty to forty dollars. In default of either penalty the accused is to go to jail for a period not to exceed one month.

The Right Birds For Laying Contest

Laying Contests conducted this year show very clearly that the degree of maturity which the birds possessed before reaching the Contests has very much to do with results and especially the results during the winter months. This fact has been stated several times, and additional proof is now available, which is given in order that those wishing to enter pens in the Contests next November may be able to take advantage of the information.

Take the Prince Edward Island Egg Laying Contest, the production has been low, not as good as it was last year, but in looking over the report of the condition of the birds when they were received at the Contest, the reason is quite apparent. The birds were not as mature this year as last and certainly not as mature as they should be if a good egg yield is to be expected.

Pens No. 13-16-12 and 18 contained the best matured birds that were received. Pens 15 and 19 were not quite as well matured, but were in excellent condition and developed rapidly after arrival. Some of the other pens had well developed individuals in them but had too many immature birds while in many of the pens the birds were fully grown when they arrived.

Healthy Mothers Healthy Babies

Every true mother realizes the fact that her baby's health depends upon her own, that the very vitality of her child is influenced by her own physical condition. How important it is, therefore, to guard against any derangement of the female organs, which induce general weakness, nervousness, constant fatigue and utter inability to properly care for her child. Please remember, that Lydia E. Pinkham's Vegetable Compound has brought health and strength to thousands of such mothers.

Mitchell, Ind.—"Lydia E. Pinkham's Vegetable Compound helped me so much during the time I was looking forward to the coming of my little one that I am recommending it to other expectant mothers. Before taking it, some days I suffered with neuralgia so badly that I thought I could not live, but after taking three bottles of Lydia E. Pinkham's Vegetable Compound I was entirely relieved of neuralgia, I had gained in strength and was able to go around and do all my housework. My baby when 7 months old weighed 19 pounds and I feel better than I have for a long time. I never had any medicine do me so much good."—Mrs. FRANK MONTGOMERY, Mitchell, Ind.

Good health during and after maternity is a most important factor to both mother and child, and many letters have been received by Lydia E. Pinkham Medicine Co., Lynn, Mass., telling of health restored during this trying period by the use of Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Vegetable Compound

for the mature birds. In some cases birds arrived at the Contests past maturity, that is, they had started to lay before entering the contest and the change brought on a moult and a consequent loss of eggs. This condition however was not quite so apparent in the Prince Edward Island Contest as in some of the other Contests.

In order to make a good yearly revenue birds must lay during the period of high prices and if they do not start laying before the cold weather comes, as a rule, they will not start to lay for weeks and sometimes months afterwards.

Pen No. 2 did not lay an egg during the first four weeks of the Contest and had only three birds laying at the end of the 8th week with a total production of 29 eggs. Pen No. 1 started laying during the fifth week and had only three birds laying at the end of the 8th week with a total production of 27 eggs. Pen No. 17 did not start until the 10th week thereby handicapping themselves by over two months and that the two months when prices were high. The birds in this pen were in condition when they arrived at the Contest and after they received their growth have done exceptionally well. How much better would it have been if they had received their growth before entering the Contest.

It must not be forgotten that development in birds does not mean production, but if birds are bred for egg production in the bird that is fully developed has a decided advantage over her immature sister.

Birds intended for a laying competition should be in condition to lay just after they have reached the Contest, neither before nor weeks after.

Weekly Agricultural Report

Reports of the past week show that considerable clover hay has been cut throughout the province. The hay crop has thickened up considerably, which will increase the yield. On the high-land it will be short. Taking the province as a whole, it would seem that a reduction of twenty-five per cent over last year's crop could be given as a fair estimate. Two weeks ago an estimate of one-third less than last year was given, but recent rains have thickened the crop up wonderfully, although coming too late to give it much more length.

Grain crops are doing well and give promise of a very satisfactory yield. Early reports of misses in the potato crop in Carleton and Victoria counties are constantly being confirmed. These vary all the way from twenty-five per cent to as high as sixty per cent of the crop in some sections. The loss sustained by some growers will be very heavy. The total production of potatoes from these sections will also be lessened very materially. On the North Shore and eastern part of the province the potato crop conditions look well and are very promising. Some blight is reported in the Blissfield section.

Pastures have been better since the rains and the milk production is keeping up fairly well. Prices of dairy products have not changed very much. There is a heavy export demand, which takes up all surplus Canadian products.

The apple crop is suffering by a very heavy crop. This has been abnormally heavy this year and in some orchards has left a very light crop. In those orchards that have been well sprayed, the fruit is clean.

PROTECT YOUR VICTORY BONDS

"Save the surface and you save all" Paint & Varnish

Use B-H Paint—it Pays

B-H Paint will withstand the severe "climate test" of many hard Canadian winters. Speaking more definitely still, there is one paint that carries a 100% guarantee on every can.

B-H PAINT

70% Pure White Lead
30% Pure White Zinc
100% Pure Solvent

Famous for its covering capacity and durability. It has a base 100% pure, to which is added a fine turpentine and an exceptional linseed oil from the B-H mills.

Some dealers can sell you paint which costs less per gallon than B-H, but it will not have the B-H guarantee of quality and permanence—neither will you have the certainty that a gallon will show the greatest covering capacity.

Even at the slightly higher cost of B-H you will find when the job is done that the ultimate cost is lower—very much lower.

Another thing, just look at any house that was painted, maybe years ago, with B-H and see the "finish" that still remains.
