THE ADVOCATE

CANADIAN DISCOVERS CANCER CURE

In connection with the announcement by Dr. M. J. Scott of Butte, Montana that a Canadian physician in New York had succeeded in segregating the cancer germ and prepared a serum which has brought about complete cures of cancer the Toronto Star publishes a special despatch from its New York correspondent which reads in part:
"The reappearance of Dr. Thomas J. Glover and his serum for cancer is expected here within the next sixty days.
"That Dr. Glover formerly of Toronto, is the unknown Canadian physician who has made the greatest discovery in medicine of the age, as announced by Dr. M. J. Scott at a staff meeting of the physicians of the St. Joseph Hospital at Omaha, Nebraska on Saturday there can be little doubt.
Not only the segregation of the cancer germ but a serum that has performed complete cures in numbers of institutions throughout the United States, is attributed to this unidentified Canadian with whom Dr. Scott has been working in collaboration.
"Just as certain as we are that the typhoid germ is the germ that causes diphtheria just so certain are we," said Dr. Scott "that we have at last isolated the cause of cancer."
"That such an announcement was coming was forecasted by Dr.

Glover himself to a member of the Star staff and a prominent Toronto physician who visited him in his secret New York laboratory at New Years time.

Jack Dempsey Will Meet Firpo On Labor Day

Jack Dempsey, world's heavy-weight champion will defend his title against Luis Firpo in New York City on Labor Day. The Argentine will be his only opponent this year.
If Firpo is beaten by Willis or Gibbons then naturally I would be compelled to fight the winner; the champion asserted. However, I understand Firpo will not engage in any fights until he meets me. Under such conditions it looks like a quiet cut door season for me; but my picture work and about six weeks of hard training should leave me fit for the fight.
Dempsey looked a bit pale and thin after his recent operation in New York.

Marriage Increases In Popularity

Marriage seems to be increasing in popularity; according to a census bulletin issued recently. The proportion of married persons in each sex was greater in 1921 (when the last census was taken) than in either 1911 or 1901. In 1901 the percentage of married males was 37.49 and of married females 33.32. In 1911 the percentages were:

married males 34.85; married females 36.97.

How to Prevent Biliousness

Doctors warn against remedies containing powerful drugs and alcohol. "The Extract of Roots, long known as Mother Seigel's Curative Syrup, has no dope or strong ingredients; it chases away indigestion, biliousness and constipation. Can be had at any drug store." Get the genuine.

Here and There

Manitoba is perhaps the most marrying province in Canada. For instance, in Ontario, there were 24,871 marriages in 1921, a rate of 8.5 per 1,000, while in Manitoba it was 8.7 per 1,000 of its 610,000 population.
Eastbound steamship travel from Canadian ports via Canadian Pacific steamships is heavier at the present time than for several years past; at this season, a recent report declares. Bookings in some instances have run as high as 70 per cent increase over those of last winter.

According to a recent official compilation, out of every 100 people in Canada 51 live on farms. The 70,000 farms in Canada represent a gross worth of \$700,000,000 or about \$10,000 per farm, and produce an annual revenue of nearly \$1,500,000, an average income per farm of \$2,000 yearly.

From the opening of the crop year, September 1st, to the official closing of navigation, December 12th, the Canadian Pacific Railway reported the heaviest marketing of grain since the inception of the road. Cars loaded by the company also created a record for the season, having numbered 116,232. Grain marketed topped the 200,000,000 bushel mark.

Thirty-seven per cent of all automobiles in Canada are owned by farmers. Ownership of the balance, according to recent statistics, is made up as follows: business men and brokers, 16 per cent; salesmen and travellers, 16 per cent; professional men, 8 per cent; laborers, 4 per cent; contractors and livery men, 3 per cent each, and miscellaneous and no occupation stated, 13 per cent.

When the Canadian Pacific liner "Empress of Canada" left New York on January 30th for her great round-the-world cruise, she was the first Canadian vessel ever to commence such a voyage carrying a regular bookstall in the charge of experienced attendants, in addition to a free library. The stock includes many excellent recent books on travel, which will enable passengers to prepare themselves for the foreign lands they will visit, as well as a large number of novels by the best-known authors.

Of the total wheat exported from Canada in November, amounting to 64,196,903 bushels, by far the greater proportion went to the United Kingdom, which took 43,815,391 bushels. The United States was second largest importer of Canadian wheat, taking 9,016,143 bushels. Italy came next, taking 4,013,152 bushels, and Greece next, with 2,066,480 bushels. The exports of Canadian wheat to France during this period amounted to 1,328,368 bushels and to Belgium, 1,075,216 bushels. Those to Germany totalled 129,320 bushels.

In the keenest competition, embracing entries from all important agricultural districts of the North American continent, Alberta farmers won 43 prizes at the recent international stock and grain show at Chicago. Two grand championships—wheat, Major G. H. L. Strange and oats, J. W. Biglands—went to the province. Major Strange was also first with white field peas and Nunemaker Brothers, of Brooks, first with red clover seed. Major Strange's success is especially remarkable as he has only been a farmer four years.

The latest statements of the earnings and expenses of the Canadian Pacific Railway show that the strong position of that organization has been well maintained, and that a steady improvement has been achieved, in spite of the difficulties of the past few years. The figures for December show gross earnings of \$19,186,874, working expenses of \$15,186,546, and a net profit of \$4,000,328, an increase of \$491,322 over that of December, 1922. The 1923 totals show gross earnings of \$198,857,089, working expenses of \$138,358,079 and a net profit of \$60,499,010, an increase of \$1,177,219 over the total earnings of the road in 1922. Net earnings for this year were the highest since 1917 and gross earnings the highest since 1920.

We 23,000 Men Present you the utmost in fine cars

THERE are 23,000 of us building Studebaker cars. Thousands of us are stockholders. All of us, after a certain time, get dividends on wages.
All of us, after two years, get vacations with pay. The company spends vast sums on co-operative work with us. When we retire we get pensions.
So Studebaker cars represent the best that we, in combination, know how to offer you.

Our fine backing
Behind us is an honored name. For 72 years Studebaker has been the leader in quality and class.
We have \$90,000,000 of assets. We have \$50,000,000 in model plants. We have 12,500 up-to-date machines.
We have an engineering department which costs \$500,000 yearly. That to maintain and develop Studebaker standards.
We subject Studebaker cars to 30,000 inspections. That requires 1,200 men.
All told over 70,000 machine and hand operations are performed. In so many operations, though each one is small, there is a great opportunity for economies.
We have a \$10,000,000 body plant, to maintain the Studebaker standard of coach work. There sons, fathers and grandfathers are working together, to build such bodies as Studebaker always built.
The open bodies are upholstered in real leather. The closed bodies in Chase Mohair. That is made from the silky fleece of Angora goats.
We pay for those extras—and others—out of savings. Building our own bodies saves you on some types up to \$300 per car.

See how Studebaker gained top place
145,167 people last year paid \$201,000,000 for Studebaker cars.
The sales have almost trebled in the past three years.
Go see the reasons. See the scores of extra values Studebaker offers.
