A warm welcome was extended to the society by Mrs. (Rev.) Robt. John-ston, setting forth the importance of foreign missions. It was not very long, she said, since a woman's convention was practically unknown, and if some devoted women, desirous of furthering some good object, ventured to meet together for consultation and union of efforts, they did so without any recognition from the official board of the church. Now woman's work is everywhere recognized as a most important factor in the social and religious movements of the world. A

He reviewed the work of the church from the birth of Christ, and said, so soon as the church caught the idea of going forth ligious movements of the world. The outlook for the future was a hopeful one. Yet there was one need—the employment of waste energies. There were over 300,000,000 professing Christians wasting their energies; there were 800,000,000 heathens, 200,000,000 people following Maohmmet, and 225,000,000 under the sway of the Greek and Roman Catholic Churches.
