SPECIAL CHINESE SACRED LILIES 35c EACH—THREE FOR \$1.00.

This is the Narcissus Orientalis, and is variously called Soy Sin Far, Jose Flower, and Flower of the Gods. This may be grown in pots of soil, but it is more interesting and quite satisfactory in bowls partly filled with pebbles and water. As the roots develop they form a network about the pebbles, thus supporting the plant when in bloom. The flowers are mostly white, with yellow cups, and are very fragrant.

GROWING BULBS INDOORS

This is an activity that can provide a real and wholesome thrill for the home-lover during the dreary fall days and the winter months. Wherever such growing is done it proves popular, because the home gardener, whether child, man or woman, will be successful if they simply follow directions. Besides, the bulbs are inexpensive, as are the vessels in which to grow them, and the method is so easy that it provides a pastime for children, as well as for their parents.

EVERY GAMMAGE BULB IS GOVERNMENT INSPECTED
